BUREAU OF THE CENSUS

William L. Austin, Director

—o—

This is one of the series of final reports on retail trade presenting the results of the 1933 Census of American Business. The statistics were collected in 1934 by a field canvass of retail stores in every State, city and county in the United States, with funds provided by the Federal Civil Works Administration. They cover the operation of retailers during the year 1933.

The reports are prepared under the supervision of Fred A. Gosnell, Chief Statistician for the Census of American Business, by John Guernsey, in charge of Retail Distribution. Assistance in the preparation of statistical data was rendered by William A. Ruff, Assistant Chief Statistician, and James O. Reid, Retail Assistant.

_____

CENSUS OF AMERICAN BUSINESS, 1933

A separate report should be prepared for every retail or wholesale place of business, every service business, hotel, theater, or other place of amusement. Combined reports for two or more establishments, even though under the same management or ownership, cannot be accepted except on special instructions from Washington.

All reports should cover, if possible, the full year's operations for 1933, even if ownership has changed during the year. If the fiscal year ends within a month before December 31 the fiscal year can be reported. Otherwise report the business of the 12 months of the calendar year 1933.

Units of chains which must be reported from the home office should fill out this form as far as possible; at least blocks 1, 2, and 3. (The balance of the information will be obtained by Washington from the chain's home office.)

Only sworn employees of the Bureau of the Census will be permitted to examine your report, and no information will be given out by the Bureau of the Census which would disclose, exactly or approximately, any of the figures in your report; provided that identifying data may be used to compile a central card file of business establishments in the United States for Government statistical purposes.

1. DESCRIPTION OF ESTABLISHMENT:

(*a*) NAME OF ESTABLISHMENT _____

(*b*) NAME OF OWNER _____

(*c*) LOCATION OF ESTABLISHMENT.
State _____ County _____ Township _____
City, town, or village _____
Street and number _____
Is this street and number located within the corporate limits of the city, town, or village? (Yes or No) _____

(*d*) WAS THIS ESTABLISHMENT IN OPERATION IN 1929? (Yes or No) _____

(*e*) NUMBER OF ESTABLISHMENTS IN SAME LINE OF BUSINESS OWNED BY THIS ORGANIZATION, ANYWHERE IN THE UNITED STATES _____ (DO NOT USE)

(*f*) WHERE IS THE HOME OFFICE (GIVE POST-OFFICE ADDRESS) _____

2. KIND OF BUSINESS:

CHECK FUNCTION

(*a*) Kind of business _____ ☐ Wholesale ☐ Retail ☐ Service ☐ Amusement ☐ Miscellaneous
(Give usual name or designation based on major kind of merchandise sold or major service rendered)

EXAMPLES.—Grocery store (or wholesale grocer), meat market, delicatessen, hardware store (or hardware wholesaler), barber shop, department store, restaurant, sugar broker, motion picture theater, bowling alley, laundry, auto repair shop, parking lot, etc. If several distinct lines of merchandise are handled in substantial amounts, the designation may be general store, general merchandise wholesaler, variety store, etc.

(*b*) Name the principal lines of goods sold or handled, or principal sources of operating revenue, *in order of their importance* based on volume of business done in 1933:

(1) _____ (4) _____
(2) _____ (5) _____
(3) _____ (6) _____

(DO NOT USE)

3. TYPE OF ESTABLISHMENT OR OPERATION:

(Check the principal function performed or type of operation; i.e., the function or type that accounts for more than 50% of the business of the establishment. (See "Instructions to Enumerators.") (CHECK ONLY ONE.)

FOR WHOLESALE

91. Assembler and country buyer ☐
81. Auction company ☐
82. Broker ☐
21. Bulk tank station ☐
14. Cash-and-carry wholesaler ☐
83. Commission merchant ☐
92. Cooperative marketing association ☐
15. Drop shipper or desk jobber ☐
12. Export merchant ☐
84. Export agency ☐
13. Importer ☐
85. Import agency ☐
10. Jobber ☐
16. Mail-order wholesaler ☐
86. Manufacturers' agent (for 2 or more mfgrs.) ☐
61. Manufacturers' sales branch (owned by mfgr.) ☐
89. Selling agent ☐
19. Supply & machinery distributor ☐
31. Warehouse (chain store) ☐
17. "Wagon distributor" ☐
10. Wholesale merchant ☐
1. Wholesaler-retailer (about equally divided) ☐
Other type (specify)
_____

FOR RETAILERS

47. Company store (commissary) ☐
42. Direct selling (house-to-house) ☐
50. Leased department in a store ☐
44. Mail-order house ☐
43. Market stand or roadside stand ☐
61. Utility-operated store (electric or gas Co.) ☐
10. Local independent ☐
20. Local chain (all units are in one community) ☐
30. Sectional or national chain (with more than local units) ☐
81. Retailer-wholesaler (about equally divided) ☐
73. Retailer-country buyer (retailer who also buys local foodstuffs for shipment to other dealers) ☐
Other type (specify)
_____

FOR SERVICE BUSINESSES, AMUSEMENTS, AIRPORTS, AND MISCELLANEOUS

10. Local independent ☐
20. Unit of chain or system ☐
50. Concession operator ☐
What kind of concession? _____

FOR HOTELS (answer each line)

10. Local independent operation ☐ 20. Unit of chain or system ☐

1. Year round ☐
2. Seasonal ☐

1. American plan ☐
2. European plan ☐
3. Both ☐

1. Mainly transient ☐
2. Mainly permanent ☐
3. About half of each ☐

1. If seasonal, open how many months in year? _____ 2. Number of guest rooms _____

4. EMPLOYMENT DATA:

(*a*) Number of proprietors and firm members (of partnerships or sole ownerships only) _____
(Do not include salaried officers of corporations, or inactive partners.)

(*b*) Number of paid employees, full-time and part-time, on pay roll December 30, 1933, or other more representative date, including salaried executives, salesmen, clerks, operatives, etc. _____ { Males _____ / Females _____

(*c*) Number of all paid *employees* on pay roll nearest the 15th of each month: (*Do not include non-salaried proprietors.*)

Month	Full-time	Part-time	Month	Full-time	Part-time	Month	Full-time	Part-time
January			May			September		
February			June			October		
March			July			November		
April			August			December		
						AVERAGE		

5. OPERATING EXPENSES (NOT INCLUDING COST OF MERCHANDISE):

(*a*) Total salaries and wages paid to *all* employees for the year 1933, or period covered by this report $ _____
(Do not include compensation of proprietors and firm members of partnerships or sole ownerships.)

(*b*) All other operating *expenses* (rent, interest, traveling expenses, advertising, overhead, and all other expenses except pay roll) $ _____
(In a theater or other place of entertainment the cost of film rental, attractions, and outside professional services is included here.)

(*c*) TOTAL operating expenses ("*a*" plus "*b*", but not including cost of merchandise) $ _____

(*d*) How much of pay roll (included in "*a*" above) was paid to part-time employees $ _____

6. NET SALES OR TOTAL OPERATING RECEIPTS:

(*a*) Receipts from sale of merchandise (deduct returned sales) $ _____
(Brokers and wholesale agents must report selling value of goods and not commissions received.)

(*b*) Receipts from service sales, parking, storage, repairs, cartage, cleaning, etc. $ _____

(*c*) Receipts from room rentals (hotels, auto camps, etc.) $ _____

(*d*) Receipts from sale of meals (and from fountain) $ _____

(*e*) Receipts from admissions (theaters and other places of amusement, athletic contests, dance halls, billiard halls, bowling alleys, etc.) $ _____

(*f*) Receipts from other sources (specify sources):

_____ $ _____

_____ $ _____

(*g*) TOTAL net sales or operating receipts (total of *a* to *f*) $ _____

7. STOCKS ON HAND:

(*a*) Value of merchandise (at cost or replacement) on hand for sale December 31, 1933, or nearest inventory date $ _____

8. SUPPLEMENTAL FACTS:

(*a*) CREDIT. (To be answered by all.) How much of total receipts (6 *g* above) represents credit business? $ _____
(Include sales made on weekly, 10-day, 30-day, end-of-month, installment or other credit basis—all except *strictly* cash sales.)

(*b*) SALES TAX. (To be answered by all.) How much of total receipts (6 *g* above) represents sales tax? $ _____

(*c*) WHOLESALERS. (To be answered by all types of wholesale establishments.) Of the total sales reported in block 6 above, give the amount of

1. Sales to retailers (for resale) $ _____
2. Sales to consumers (at retail) $ _____
3. Sales to industrial users $ _____

(*d*) RETAILERS. (To be answered by retailers.) How much, if any, of your total sales were made to other retailers? $ _____

REMARKS: _____

CERTIFICATE

U. S. GOVERNMENT PRINTING OFFICE: 1933 11—11141

RETAIL CENSUS REPORTS - FINAL SERIES: 1933

ARRANGEMENT AND CONTENTS OF VOLUMES

Volume 1 - U. S. Summary. Contains a general description of the Retail Census for 1933, definitions of terms and classifications, and U. S. Summaries, by kinds of business and by States, of Tables 1 to 6 and 10 to 12 contained in volumes listed below. It also includes tables providing an analysis of retail sales (Table 7), a summary of wholesalers' sales at retail (Table 8) and an analysis of receipts of service establishments (Table 9).

A separate section presents an analysis by size of city of stores and sales, classified into 11 kind-of-business groups. This analysis is carried through for each State and geographic division and summarized for the United States as a whole.

Comparisons with 1929 of the principal data by kinds of business are contained in a special table (Table A), which is presented separately for each State and in summary for the United States.

A chain-store section contains a summary of all known retail chains, classified by kinds of business, showing units, sales, stocks, employees and payroll in stores and in central offices, reported expenses in stores and in central offices and the proportion prorated to stores.

Volume 2 - General Statistics, by States and 13 largest cities, by kinds of business (Table 1). Employment, by States and 13 largest cities, by kinds of business (Table 2).

Volume 3 - County Totals. Contains summary of stores, sales, proprietors, full-time employees and payroll for each city, town and county throughout the United States (Table 11), and summary by 52 kinds of business for each city of more than 50,000 population (Table 12).

Volume 4 - Analysis of Stores by Date of Establishment, showing for each State and for each kind of business the number and sales of stores established in 1933 (by quarters), those established between 1929 and 1933, and those in operation in 1933 which were also in operation in 1929 (Table 6).

Volume 5 - Credit Business. Contains analysis for each State of stores and sales, by kinds of business, classified to show credit-granting stores separate from all-cash stores (Table 5).

Volume 6 - Chains and Independents and other types of operation - State totals, and more detailed analyses for 18 kinds of business in which chains are a more or less important factor (Table 3).

Volume 7 - Stores and Sales by Size of Business Shows stores and sales by kinds of business, classified in 10 size groups, by States (Table 4).

Volume 8 - Retail Distribution, 1933, by Areas. Stores and sales by 11 business groups, for States, counties and cities (Table 10).

Special Reports by Trades. Food Retailing, Variety-Store Chains, Department-Store Chains, Drug Retailing (including drug-store chains), Retail Employment and Wages, Automotive Retailing, Apparel Retailing and others. (Separate reports have been issued covering the above-named subjects; they are not brought together in a single volume).

1/ Campbell and Milton Counties in Georgia combined with Fulton County since 1930 Population Census. 2/ Union City, Indiana-Ohio included in Indiana.

3/ Based on major sample as published in 1929 Census
4/ If Unidentified stores are classed with all-cash stores } See "Retail Credit," Section 4 of text.

5/ The number of part-time employees in 1929 as published for that year were computed on the basis of mean average, not strictly comparable with the montly average used for 1933. The figures herein have been adjusted.

1/ Based on major sample as published in 1929 Census
2/ If unidentified stores are classed with all-cash stores
} See "Retail credit", Section 4 of text.

3/ The number of part-time employees in 1929 as published for that year were computed on the basis of mean average, not strictly comparable with the monthly average used for 1933. The figures herein have been adjusted.

RETAIL DISTRIBUTION — UNITED STATES SUMMARY: 1933

CHAPTER I - GENERAL SURVEY OF RETAIL DISTRIBUTION

INTRODUCTION

This is a summary for the United States presenting the results of the second Census of Retail Distribution. The first such Census was taken as part of the Census of Distribution of 1929. A summary for 1929, comparable to this, is contained in Distribution, Volume I, Part 1, one of the reports of the Fifteenth Census of the United States.

The second Retail Census was taken as part of the Census of American Business, which included also a Census of Wholesale establishment and a Census of Service establishments, Places of Amusement and Hotels.

The Census was made possible by funds supplied to the Bureau of the Census by the Federal Civil Works Administration. The data were obtained by a field canvass through enumerators provided by the Civil Works Administration, directed and supervised by the regular field organization of the Bureau of the Census.

Scope of the Retail Census

Retail distribution, as covered in this Census, is the process of purveying goods to ultimate consumers for consumption or utilization, together with services incidental to the sale of goods. The function of the retailer is primarily to anticipate the wants of the consumer and to make available, at the right time and at a convenient place,a reasonable selection of goods capable of satisfying those wants. The distinguishing characteristic of of retailer is that the business is done in a retail manner, in a place of business open to the general public.

Retail and Service

Every effort was made to make the 1933 data directly comparable so far as possible with the Retail Census for 1929. However, because of the broader scope of the current Census it was possible to differentiate more accurately than heretofore the establishments whose business embraces a substantial proportion of service as well as the sale of merchandise. With certain exceptions those businesses which reported receipts from services in excess of the receipts for the sale of merchandise were classified in their entirety in the Service Census; and those showing receipts from services in lesser dollar value than sales of merchandise were classified in their entirety in the Retail Census. The exceptions are mainly in the three groups - lumber, building and hardware; furniture and household; and automotive - where retail stores do a considerable business in repairs and installation. In a number of kinds of business in these groups, specifically noted in Chapter II, an establishment was classified as a retail store if the receipts from the sale of merchandise did not fall below one-third of its aggregate gross revenue. It was felt in these cases that unless the minimum percentage for receipts from merchandise sales was set at a low level there was danger of confusing what are essentially retail stores with service establishments. Because of the conditions obtaining in 1933 and the preceding year, merchandise sales dwindled to such an extent that revenue from service, ordinarily a subordinate function of the business,

assumed unusual importance. It is not unlikely that during the worst months of the depression some retailers were forced to stress particularily repair and renovation work in order to weather the period of adverse economic conditions.

Retail and Wholesale

As in the 1929 census the line of separation between retail and wholesale establishments was drawn at 50 percent. Only those stores whose sales at retail exceeded 50 percent of total sales were classified with retail establishments. The number of cases in which this somewhat arbitrary rule had to be applied was of course small relative to the total number of establishments covered. Borderline cases of this type occur most frequently in the distribution of hardware, farm implements, building materials, coal, office and store equipment, motor vehicles and gasoline. In the study of retail distribution in these several fields it is essential therefore to consider both the Wholesale and the Retail censuses. Similarly in comparing the 1933 data with 1929 it should be noted that for stores in these fields a relatively small change in sales at retail may cause a shift in classification from wholesale to retail or vica versa.

Because of the nature of the business - distribution to industrial users - and regardless of the manner in which the sales are made, supply houses, including artists' supplies, barbers' supplies and dental supplies, have been included in the wholesale census rather than in the retail census. So, too, have most machinery dealers and dealers in iron and steel products, leather and findings and junk.

Retail and Manufactures

Some retail establishments also manufacture all or some of the products which they sell. In general the principle has been followed of classifying such establishments with manufacturing plants when the value of their products exceeded $5,000; as such they are enumerated by the Census of Manufactures. However, planing mills and lumber yards which manufacture their own lumber and mill work are entirely excluded from the Retail Census.

The 1933 Schedule

A single schedule form was used for 1933, on which information was collected for all establishments canvassed in the Census of American Business. A copy of it is included in this volume. As may be readily seen by comparing it with the schedule form used for 1929 (reproductions of these appear in Distribution, Vol. I, pt. 1), it represents in the main an abridgment of the 1929 forms for the purpose of saving time and expense in collecting and tabulating the material. The more essential inquiries were retained, although not with the same amount of detail. Some questions on the other hand were reformulated in the light of the experience with the first census, and others expanded, notably the question on employment. The most important omission was the inquiry on "Sales by Commodities", in which the respondent was requested to indicate for the year 1929 the amount of net sales of each important commodity or group of commodities. The omission of that question makes it impossible to estimate on the basis of the 1933 census the volume of retail sales by types of merchandise, and affects to a certain extent the comparability of the classification by kinds of business.

Basic Classifications

The findings of the 1933 census are presented in two basic classifications: by geographic divisions, States, cities and counties; and by kinds-of-business groups, based on the usual designation of the establishment and the principal lines of merchandise handled. The first indicates the geographic distribution of retail business and of its component parts - grocery stores, restaurants hardware stores, clothing stores, etc., and permits the presentation of a quantitative description of the retail trade for each area.

The second classification - by kinds of business - is in a sense more fundamental than the first. Retail distribution as such is but a thoretical concept the precise meaning of which is not always clear; in real life one deals with delicatessen stores, drug stores and filling stations. The practical business man as well as the student of marketing will find information on retailing by kinds of business of much greater value than aggregate figures on retail trade. A description of the kind of business classifications followed for 1933 and a tabular comparison of the 1933 and 1929 classifications will be found in chapters II and III, respectively.

Comparisons with 1929

In taking the 1933 census every effort was made to insure comparability of the data with those for 1929. As a result the figures for 1933 and 1929 may properly be compared and conclusions drawn on the basis of such comparisons. No significance, however, should be attached to those cases in which only small differences are found, for no two censuses can be made exactly alike from the standpoint of coverage and throughness of canvass.

On a few specific points comparability is somewnat impaired by the differences in the phrasing of the inquiry; these are noted when such comparisons are discussed. The two important considerations which affect comparisons between apparently identical kind-of-business groups in 1933 and 1929 should, however, be mentioned here. One of these is the fact that in 1933 the kind-of-business classification is based on the usual designation of the the store or the principal lines of goods handled, in the absence of information on sales by commodities utilized in classifying reports for 1929; for this reason a store may have been differently classified in 1933 ever though the nature of its business was the same as in 1929.

Another consideration affecting comparability is that in 1929, in the absence of a separate census of service establishments, some shops which in 1933 would have been treated as service establishments were grouped with retail stores.

Section 1.- Stores and Sales

In 1933 retail trade in the United States comprised 1,526,119 stores with reported sales of $25,037,225,000. In 1929 retail stores numbered 1,543,158 with sales of $49,114,-653,000. Thus the number of stores remained practically unchanged, particularly if account is taken of the elimination of service establishments from the retail census, to which references have been made in the Introduction and Chapter II. Sales on the other hand declined about 49 percent with the result that average sales per store decreased in about the same proportion.

How much of the decrease in the dollar volume of sales is due to the decline in retail prices and how much to the reduction in the physical quantity of goods sold cannot be readily ascertained. The use of currently compiled retail price indexes in this connection is a practice of dubious validity because the Census classification of establishments by kinds of business is based on the principal kinds of goods handled; the sale of other goods not reflected in the price index may account for a considerable proportion of total sales in certain kind-of-business groups. Moreover, the weighting used in the available price indexes cannot be tested with reference to 1933 Census figures on sales in the absence of information on the distribution of sales by commodities.

While reliance upon price indexes to measure the proportion of sales change attributable to price fluctuation is to be discouraged, such indexes may suggest a rough and tentative explanation of differences in sales changes as between kind-of-business groups. In addition to the better known retail price indexes, such as the Bureau of Labor Statistics index of food prices, readily available in other sources, reference is made to the appended frequency distribution of price changes from 1929 to 1933. This has been compiled by the Bureau of the Census, with the cooperation of a leading mail-order house, from catalog prices of 30 commodities or groups of commodities, composed of 204 items.

Sales by States

The geographic distribution of retail stores and sales, as shown in Table 1B, suggests a considerable degree of concentration. Two geographic divisions - the Middle Atlantic and East North Central - account for about 45 percent of the number of stores and nearly 48 percent of the amount of sales. The five States with the largest volume of sales - New York, Pennsylvania, Illinois, California and Ohio - have about 37 percent of the stores and nearly 46 percent of the sales. This concentration is related, of course, to the distribution of population. According to the 1930 census the two geographic divisions represented 42 percent of the population, and the five States 34 percent. Other factors are also relevant, as is indicated by variation in per capita sales by States. On the basis of the 1930 population, the three States with highest per capita retail sales are California with $298, New York with $297 and Massachusetts with $281; the figures contrast with $70 for Mississippi, $95 for Alabama, and $97 for Arkansas. Per capita sales figures, however, must be used with some caution. The increase in population since April, 1930, was not proportionately distributed among the States; moreover sales made in certain States undoubtedly are distorted by purchases by people from other States.

The decline in sales from 1929 to 1933, which averaged 49 percent for the country as a whole, was unevenly distributed among the States. (See Table A). As is apparent from the following tabulation the bulk of the States show decreases within the range of 44 to 53

percent. The States in which sales declined less than 44 percent are mainly in the New England and South Atlantic geographic divisions, whereas the States with sales-decline exceeding 53 percent are in the West North Central, West South Central and the Mountain divisions. It is significant perhaps that six of the eight States in the first group show an increase in the number of stores, whereas seven of the ten States in the second group have experienced a reduction in number of stores.

Sales By Kinds of Business

According to the 1933 returns as presented in Table 1A nearly 33 percent of the total volume of retail sales was made in food stores and restaurants, over 22 percent in stores of the general merchandise and apparel group and about 18 percent in stores of the automotive group. These ratios appear to arrange themselves into a neat pattern ostensibly indicating the distribution of the expenditures of American people on food, clothing and pleasure cars. Such an interpretation, however, would be inaccurate; for sales by stores in a particular kind of business group are not identical with sales of the principal commodity which they handle.

An examination of changes from 1929 to 1933 in the volume of retail sales by kinds of business, presented in the appended summary and in detail in Table A, is more illuminating. When these changes are arranted in the order of increasing magnitude, the following array is obtained:

Group	Percent of decrease
Food	-37
Restaurant*	-38
General merchandise	-40
Automotive	-54
Apparel	-55
Farmers' - general	-58
Furniture - household	-65
Lumber - hardware	-65

*Excluding drinking places not enumerated in 1929.

This can be legitimately interpreted to mean that in a period of reduced purchasing powere expenditures on articles of food decline least, on durable consumer goods most, with expenditures on apparel occupying an intermediate position. In drawing conclusions of this type, however, the change in prices must be taken into account. As pointed out above no reliable retail price indexes directly applicable to Census data are readily available. Still a comparison of the 36 percent decline from 1929 to 1933 in the Bureau of Labor Statistics index of retail food prices with the 37 percent decline in food store sales is highly suggestive.

A closer scrutiny of the percentage declines in sales shown in Table A reveals some interesting differences in the percentages within the major kind-of-business group. In the food group combination stores, selling groceries and meats, have apparently been gaining at the expense of both grocery stores and meat markets. In the general merchandise group variety store sales have declined less than department store sales, because they sell low priced merchandise appealing to large groups of the population. The small decline in the sales of other general merchandise stores is accounted for in part by the inclusion in this group in 1933 of those 1929 department stores whose sales fell below $100,000, the minimum for department stores according to the Census definition. As might be expected in a period of depression, the sales of filling stations and repair garages declined very much less than the sales of dealers in vehicles and accessories. A minor factor in the relatively better showing of filling stations is a more complete coverage in 1933; the canvass for 1929 was impeded in some cases by the difficulty of distinguishing between units of oil chains and independent agencies of the same companies.

A summary of stores and sales by business groups follows:

Comparison of Stores and Sales by Kinds of Business, 1933 and 1929.

Kind of Business	Number of Stores		Net Sales			Percent of Total Sales	
				% of			
	1933	1929	1933	Change	1929	1933	1939

Section 2.- Employment and Payroll

There were employed in retail stores throughout 1933 an average of 2,703,325 full-time employees, 730,327 part-time employees and 1,574,341 proprietor owners actively engaged in the operation of their stores, or a total of 5,007,993 persons compared with 5,913,547 persons in 1929, a decline of about 15 percent.

The number of employees contained in the various tables of this report is the average of 12 monthly employment figures. Separate figures for each month may be found in tables 2 of these reports, which also show the number of men and women employees separately. A summary of monthly employment follows:

Month (1933)	Average Number of Employees			Increase over Preceding Month	
	Total	Full-Time	Part-Time	Total Number	Percent
Year (average)	3,433,652	2,703,325	730,327	-	-
January	3,118,076	2,502,823	615,253	-	-
February	3,113,391	2,489,807	623,584	-	-
March	3,125,031	2,489,884	635,147	-	-
April	3,286,347	2,572,968	713,379	161,316	5.2
May	3,298,135	2,598,129	700,006	11,788	.4
June	3,372,225	2,650,222	722,003	74,090	2.2
July	3,391,053	2,673,447	717,606	18,828	.6
August	3,473,172	2,744,186	728,986	82,119	2.4
September	3,637,628	2,866,906	770,722	164,456	4.7
October	3,703,621	2,907,008	796,613	65,993	1.8
November	3,734,842	2,920,032	814,810	31,221	.8
December	3,950,299	3,024,485	925,814	215,457	5.8

Total payroll in retail stores for 1933 aggregated $2,910,445,000, of which $2,664,-447,000 was paid to full-time employees and $245,998,000 to part-time employees. The compensation of proprietors is not included and is discussed separately in Section 3, page 19.

Comparison with 1929

The significance of comparisons of employment and payroll between 1933 and 1929 cannot be overestimated. They reveal the nature and extent of changes which occurred in this field during the four years of unsettled business conditions. As indicated in Section 10 the number of full-time employees declined 1,130,000 (29.5 percent) in the four years since 1929 and the number of part-timers increased 161,000 (28.3 percent). The number of proprietors also increased nearly 62,000 (4.2 percent), despite a decline of over 17,000 in the number of stores.

The magnitude of the changes in employment since 1929 is so appreciable that, for United States totals at least, the result is not significantly affected by the differences in the method of computing averages for the year. These, however, must be noted at this point. The 1929 schedule called for information on the number of employees in April, July, October and December, 1929, and at the time the canvass was made, whereas on the 1933 schedule information was requested for the payroll period ending nearest the fifteenth of each

month, as well as for December 30 by sex. The 1929 average was calculated separately for each schedule on the basis of information described above, whereas the 1933 average is the arithmetic mean of the twelve monthly figures. For purposes of comparison with 1933, the 1929 average for part-time employees was recalculated as an arithmetic mean of the four quarterly figures. This accounts for the reduction in the 1929 number of part-time employees from 676,559, a figure published in the 1929 volumes pertaining to the Census of Distribution, to 569,359, the figure used in the reports of the Census of American Business

A part-time employee is defined by the Census as a person employed only a few hours or days of the normal work-week or other payroll period. The Census figures on part-time employees do not indicate what proportion of full-time was worked by them, but an approximation of this proportion can be established by comparing the average annual earnings of part-time employees with the average annual earnings of full-time employees. The average annual earnings of part-time employees are shown to be 34.2 percent of the average annual earnings of full-time employees, indicating that the average part-time employee works about one-third of the normal number of working hours or days of a full-time employee. On this basis the average part-time employee in 1929 worked 21.6 percent of the number of hours or days of the full-time employee in that year. This increase in time worked, and the growth in numbers mentioned above, indicate the increased importance of part-time employment in the retail field.

Table 1A in this volume shows the number of full-time and part-time employees by kinds of business; Table 1B shows the same information by States and Table A shows a comparison by kinds of business and by States between 1933 and 1929.

Employment by Months

Employment is the only item in the 1933 Retail Census on which information was requested by months. The number of employees, therefore, is the only available Census measure of the change in conditions which occurred in the course of 1933. Tables 2A and 2B indicate employment in retail trade as a whole increased continually, but not evenly, each month beginning with April. A part of this increase undoubtedly reflects the operation of seasonal factors; the remainder may be credited to improvement in retail trade, and to government measures intended to increase employment, such as the President's Reemployment Agreement and later the NRA codes which were effective during the last quarter..

Employment by Sex

Tables 2A and 2B give also the average number of employees by sex and the proportion of women employees in each kind of business and in each State. Of the 3,433,652 employees in 1933, 2,360,474 (68.7 percent) were men and 1,073,178 (31.3 percent) were women. These proportions compare with 68 percent of men and 32 percent of women in 1929. The absolute figures in both years are estimates based on the reported proportions by sex on a particular date--December 30, 1933, and the date of the canvass for 1929. Neither figure includes central-office employees of chain store organizations, which are shown in a summary in section 6.

No analysis of proprietors by sex is available for 1933. The 1929 Census covering approximately the same number of proprietors showed that 91 percent were men and 9 percent were women.

Average Earnings of Full-Time Employees

The average full-time employee in 1933 was paid $986 for the year, which compares with $1,312 in 1929, showing a decline of about 25 percent. This is perhaps the most accurate measure available of the decline in the rate of pay of retail employees. The decline was not uniform throughout the country. It averaged 19 percent in New England, 22 and 23 percent along the Atlantic Coast, 24 percent along the Pacific Coast, and as much as 28 percent in the West South-Central division, particularly Arkansas and Oklahoma.

The decline in average earnings of employees in the four-year period varied also by kinds of business from as little as 15 percent in grocery stores and 18 percent in filling stations to as much as 34 percent in the case of employees of motor-vehicle dealers. Variety stores constitute the only kind of business showing an increase in employees' earnings, the average having gone up from $706 in 1929 to $760 in 1933. The relative magnitude of the declines is apparently not related to either the decline in sales or the level of compensation obtaining in 1929.

Table A presents the comparisons of average annual earnings by States as well as by kinds of business.

The average of annual earnings is obtained by dividing full-time payroll by the average number of full-time employees. Because the average number of employees for the year is obtained by averaging the numbers reported for pay periods ending nearest the 15th of each month, the two factors are directly comparable except for fluctuation in the number of employees within the month in those cases when the pay period is shorter than a month.

Since no breakdown of employees or payroll is available by grades or salary rates, average annual earnings may be somewhat misleading in some comparisons. In proprietorships, which constitute a very large proportion of retail stores (about 84 percent in 1929), the proprietors usually fulfill the functions performed in incorporated organizations by the one or two highest paid employees. In such proprietorships, most of which are small stores, the highest-paid employees may therefore be several classifications lower in the wage scale than the executives of incorporated stores. This factor tends to lower the average of annual earnings of full-time employees in independent stores as compared with chain units, whose payrolls include such store-operating executives as store managers, and often part of the pay of division superintendents. It also tends to bias comparisons between kinds of business in which the typical operating units differ appreciably in size.

Section 3.- Operating Expense

Store operating expense, both payroll and in total, was substantially higher in proportion to sales in 1933 than it was in 1929. It averaged $29.39 per $100 of sales on the basis of the Bureau's calculations for 1933, whereas the average shown by the Census of Distribution for 1929 was $24.83. The increase in operating expense ratio is due primarily to the drastic decline in sales, which in four years dropped 49 percent. However, these averages are not strictly comparable, as explained in later paragraphs.

While payroll was reduced 42 percent from 1929 to 1933, through a decline in both the number of employees and the rates of pay, other reported expenses, (not including an allowance for proprietors' compensation), were decreased only 31 percent. Reported expenses per $100 of sales in 1933 as compared with 1929 were thus as follows:

	1933	1929
Payroll	$11.62	$10.57
Other	14.34	10.55
Total reported expense	$25.96	$21.12

Proprietors' Compensation

Reported expenses include no allowance for the value of the services of proprietors of unincorporated businesses who devote all or the major part of their time to the business. The inclusion of some allowance for such services appear to be imperative in the case of retail stores, if comparisons of expense aggregates or ratios by kinds of business, geographic divisions or years are to carry any significance. It does not seem possible to allow for proprietors' services by using the total withdrawals or charges to drawing account, for in the last analysis the drawing account is available only if the profits of the business provide it, and frequently the withdrawals measure not only the value of services but also the return on invested capital. The unreliability of such data was clearly shown in the 1929 canvass when figures obtained on proprietors' salaries and commissions "were so varied and often fantastic that they were useless". (Distribution, Vol. I, pt. 1, p. 43). Therefore the Census Bureau adopted in 1929 and continued in the current Census the practice of adding to reported expense the clerk-value of proprietors' services computed at the rate paid to the average full-time employee in the same kind of business.

Although the method of calculating proprietors' compensation followed in 1933 in the main is the same as in 1929, differences appear on two points. The first is the change in computing proprietors' compensation for stores with sales under $10,000. In 1929 no account was taken of the fact that such stores in many kinds of business can scarcely support the charge of a full-time wage. In 1933 the number of such stores was 45 percent larger than in 1929, and they accounted for nearly two-thirds of the total number of stores. Moreover, the sales of stores of this size averaged only $3,530.

From the analysis of stores by date of establishment (see volume IV of the series of final retail reports), it was furthermore clear that perhaps as many as 18 percent of these stores were established since April 1, 1933 and thus were not operating a full year. For this reason it was felt that some adjustment in the method of computation for small stores must be made. After consultation with representatives of government bureaus depending upon

retail census data it was decided that the least objectionable method of adjustment is to reduce proprietors' compensation in stores with sales under $10,000 in proportion to the ratio of each store's sales to $10,000. To illustrate, proprietors' compensation for drug stores with sales below $10,000 was obtained as follows: $985 X $\frac{5,131}{10,000}$ = $505, where $985 measures the average compensation of full-time employees in drug stores and $5,131 the average sales of drug stores with sales under $10,000.

The second departure from the 1929 method is that compensation was computed on the basis of United States totals rather than on an average for the forty-eight states. In addition, similar computations were made for the States of California, Georgia, Indiana, Kansas and New York.

Operating Expense

Operating expense includes reported expense and an imputed compensation for proprietors calculated as described above. For retail trade as a whole operating expense averaged $29.39 per $100 of sales in 1933, as compared with $24.83 in 1929. A number of kind-of-business groups, however, show an expense ratio considerably lower than this average. Among them are the following:

	Operating Expense per $100 of Sales	
	1933	1929
Grocery stores	$20.00	$17.36
Combination stores (grocery and meat)	19.90	16.10
Meat markets	27.50	19.61
Country-general stores	17.00	13.59
Farmer Supply stores	18.30	13.67
Variety stores	28.90	24.96
Dry goods and general-mdse. stores	26.10	22.50
Motor-vehicle dealers	21.20	17.77
Filling stations	27.40	23.81
Hardware	29.20	22.78
Cigar stores	27.60	31.40

Other kinds of business, whose expense ratio is above the average are:

Department stores	32.70	28.36
Women's ready-to-wear specialty stores	32.10	29.10
Shoe stores	32.40	29.39
Drug stores	30.90	27.10
News dealers	30.30	27.09
Lumber dealers	31.00	21.78
Coal and wood yards	30.70	24.84

Table 1C, page A-5, presents, by kinds of business for the United States and separately for the five States of California, Georgia, Indiana, Kansas and New York, the basic data on which operating expense ratios have been computed for 1933. The tables include three columns of ratios. The first is the ratio which 1933 expense would show if proprietors' compensation were computed without adjustment for those stores under $10,000 in annual sales. The second is the ratio of expense which was shown in the 1929 Retail Census reports. The third is the ratio which 1933 expense shows when computed on the adjusted basis described in preceding paragraphs.

Section 4.- Retail Credit

In 1933 retailers sold nearly $7,000,000,000 of merchandise on credit, which constitutes about 28 percent of total retail sales in that year. One-half of the total number of stores were credit-granting stores; sales in such stores accounted for 62 percent of total sales in all stores. Of the sales in credit-granting stores, 45 percent was made on credit in 1933 as compared sith 53 percent in 1929.

Comparison with 1929

Other comparisons with 1929 are somewhat difficult because in 1929 credit sales were not defined as broadly as in 1933, when every sale which was not strictly a cash sale was regarded as a credit transaction.1/ In 1929 a considerable number of stores - 240,604 stores with sales aggregating $5,894,681,000 - failed to report clearly whether and how much they sold on credit and were not included in the 1929 credit tabulations. The credit analysis for 1929 was carried through on the 1,302,554 reporting stores after the 240,604 stores not sufficiently identified were eliminated. In 1933, on the other hand, tne coverage on the credit question was more complete and the few stores which failed to report clearly on credit sales were grouped with cash stores for practical purposes.

The comparison with 1929 is presented in a summary below, in which two sets of percentages are given for 1929---one as published in the 1929 volume on Retail Distribution and the other based on totals merging stores selling entirely for cash with those whose credit status was not clear.

	1933	1929	
	Percent of Total	Percent of excluding unidentified stores	of total including unidentified stores
Number of stores reporting credit sales.....	50	50	42
Sales of such stores-percent to total sales	62	65	57
Credit sales---percent to total sales.....	28	34	30

It is clear that, although the number of credit-granting stores is greater, the relative amount of credit sales by retailers in 1933 was smaller than in 1929; this holds regardless of which set of figures for 1929 is used for comparison with 1933.

Volume of Retail Credit

The volume of credit sales reported by retailers for 1933 is $6,943,584,000. This figure, however, covers only credit extended by retailers - sales for which they received no immediate payment in cash. To measure the full volume of retail credit, allowance must be made for credit extended by installment-finance companies. Some retailers, particularly

1/ The schedule reads: "Include sales made on weekly, 10-day, 30-day, end-of-month, installment or other credit basis- all except strictly cash sales".

RETAIL DISTRIBUTION: 1933

COMPARATIVE SUMMARY OF CREDIT BUSINESS: 1933 AND 1929

For 13 Representative Kinds of Business

(Sales are expressed in thousands of dollars)

KIND OF BUSINESS	TOTAL		STORES REPORTING CREDIT SALES				STORES NOT REPORTING CREDIT SALES		Ratio of Stores Not Reporting Credit Sales, to Total Stores		Ratio of Credit Sales to Total Sales
	Stores	Sales	Stores	Total Sales	Credit Sales	Ratio to Total Sales of Credit Stores	Stores	Sales	Stores	Sales	
1933											
TOTAL	1,526,119	25,037,225	766,561	15,410,601	6,943,584	45	759,558	9,626,624	50	38	28

automobile dealers, use outside finance companies to carry their deferred payment accounts. Their customers pay the cost of this financing and the dealers receive from the finance companies the amount in cash that they would have received had they sold to the customer for cash. As a result most motor vehicle dealers using such a plan regarded their sales under it as cash sales and so reported. In 1933, for instance, of the $2,127,720,000 of total sales of motor-vehicle dealers the amount reported as credit sales is only $862,473,000 or 41 percent, whereas if finance company credit is included it is probable that a much larger proportion of their sales was on credit. Due to lack of uniform terminology it is impossible to state from the data at hand how much of the $862,473,000 represents credit extended by retailers and how much is finance-company credit.

Nor is it possible to state with any degree of precision the volume of retail purchases financed by finance companies. According to reports received by the Bureau of the Census from a large sample of finance companies, the obligations assumed by them in connection with retail purchases of new and used passenger cars amounted in 1933 to nearly $600,000,000. There is no doubt, therefore, that the amount of consumer credit in 1933 was considerably greater than the amount reported to the Census of American Business as having been extended by retailers.

Installment Credit

In 1929 data were available which made it possible to estimate that installment credit for that year approximated 13 percent of total sales and that open-account credit approximated 21 percent. The schedule for 1933 carried no inquiry on installment credit.

Credit by Kinds of Business

Table 5A presents the information concerning retail credits by kinds of business for 1933, and shows the percentage of business done on a credit basis and the proportion of credit to cash sales in each kind of business. It also shows the number of stores extending credit and the number opeating entirely on a cash basis or not clearly identified as to their credit status.

The average degree of change in credit ratio in credit-granting stores, shown for the United States as a whole, from 53 percent in 1929 to 45 percet in 1933, is reasonably consistent throughout the various kinds of business, but there are some exceptions worthy of note, as may be seen from the comparative summary of 13 representative kinds of business for 1933 and for 1929 on the opposite page.

Credit By States

Table 5B presents credit information by States, showing the number of stores reporting credit, the amount of their sales, the proportion of their business which is credit and the proportion of total business which is done on a cash basis.

In few States is there a material change in the proportion of stores extending credit, particularly if the number of stores omitted in the 1929 tabulation is taken into account. The proportion of credit sales to total sales of stores reporting credit is, however, consistently lower in 1933, as may be seen from a comparative summary of the 1933 and 1929 figures by States on the following page.

The decline in credit business was most pronounced in the industrial States of the East North Central and Middle Atlantic divisions, while an appreciably smaller decline is to be observed in the agricultural regions, particularly the West North Central and South Atlantic divisions.

RETAIL DISTRIBUTION: 1933

COMPARATIVE SUMMARY OF CREDIT BUSINESS: 1933 AND 1929

By Geographic Divisions and States
(Sales are expressed in thousands of dollars)

1/ - All stores did not report in 1929 as to their credit activities or whether they sold entirely for cash. The totals here include all stores, except 240,604 stores with sales of $5,0[illegible],691,269 which failed to report as to their credit activities. (See Table 7B, Retail Census reports for 1929)

Section 5.- Types of Operation

Of the 1,526,119 retail stores canvassed in the Census, nearly 1,350,000, or over 88 percent, were operated as independent stores, and about 142,000, or 9 percent as chain units, defined as units operating under a single management supervising more than three stores The sales of independents amounted to $17,826,562,000, constituting 71 percent of total retail sales, while chain store sales aggregated $6,312,769,000, or 25 percent of the total. Stores under other types of operation accounted thus for only 2.3 percent of the places of business and 3.6 percent of the volume of sales. They include mail-order houses, selling by mail through the use of catalogs; stores operated by public utility companies mainly for the sale of electric and gas household appliances; commissary stores owned by manufacturing, mining or other companies primarily for the sale of goods to their employees; direct selling (house-to-house) retailers operating from central points with crews of solicitors; leased departments found most frequently in department stores and operated independently of the lessor; and a great miscellany of other types, including itinerant vendors, rolling stores, roadside markets or stands, and the like. Because of the difficulty of canvassing some of these "other types" the census enumeration of them is likely to have been incomplete.

A summary showing the number of retail units and sales by types of operation and the comparative 1929 figures follows:

Comparison of Retail Stores by Types of Operation
(Sales are stated in thousands of dollars)

Type	Number of Stores		%	Sales				%
	1933	1929	Change	1933	%	1929	%	Change

Changes in Stores and Sales: 1929-1933

In 1933 there were 26,000 fewer independent stores and 6,400 fewer chain stores than in 1929. On the other hand there were 5,400 more direct-selling (house-to-house) retailers, 40 more mail-order houses, and about 10,000 more stores of other types, including leased departments, cooperatives, etc.

More striking than the change in number of stores was the change in sales by types. In 1929 chains did 20.0 percent of the total of all retail business of the country; by 1933 the chain ratio had increased to 25.2. Independents, on the other hand, dropped from 77.5 percent of the total business in 1929 to 71.2 percent in 1933. Another way of measuring the shift is to indicate that the sales of independents had decreased from 1929 to 1933 by 53.2 percent, whereas the sales of chains decreased by 35.8 percent.

The higher chain ratio in 1933 for retail trade as a whole does not mean that the

chains in all kinds of business have weathered the four years of depression better than independents. Much of the cause of the smaller aggregate decline in chain sales than in independent sales is the relatively smaller decline in the sales of those kinds of business in which chains prefer to operate--food, variety and drug stores, and filling stations. In these four fields, which account for more than one-half of total chain store sales, the decline in sales between 1929 and 1933 (for chains and independents combined) averaged 34 percent, compared with 56 percent in all the other business fields together. In most of those kinds of business which experienced the greatest decline in sales volume, chains are a negligible factor.

Direct-selling doubled in dollar volume, increasing from $93,961,000 in 1929 to $187,368,000 in 1933. In view of the comparatively small volume of sales reported to the Census even for 1933, it is doubtful whether the increase in the number and activity of direct-selling retailers may legitimately be interpreted as reflecting the attempt by persons otherwise unemployed to make their living by house-to-house canvassing.

There is less doubt that the increase in the number of commissary stores and the relatively small decline in their sales reflects primarily the understatement of this type of retail operation in 1929 due to difficulty in identification.

Another increase in stores and small decline in sales is shown for "other types". Here too the figures for 1929 and 1933 are not strictly comparable. In 1933 the brevity of the schedule made the identification of retailers-country buyers and of retailers-wholesalers extremely difficult. For this reason most of them were undoubtedly classified as independents instead of among "Other Types". To improve the comparability of the 1929 and 1933 data the 1929 figures for the two classifications named above were merged with independents. As a result the 1929 figures for "Other Types" as shown in the above summary table do not include an allowance for those retailers-country buyers and retailers-wholesalers that may have been classified with "Other Types" in 1933.

Changes in Sales By Kinds of Business

In the appended summary the relative distribution of sales among independents, chains and other types in 1933 and 1929 is presented for fifteen kinds of business. An examination of the summary reveals that the chain ratio has materially increased in five lines: department stores, combination stores, shoe stores, cigar stores and drug stores. Of these the first two warrant separate comment.

COMPARISON OF RETAIL SALES RATIOS
BY TYPES OF OPERATION, 1933 and 1929

Kind of Business	Independents		Chains		Other Types

x - No true comparisons available.

A/ - Direct-selling (0.7%), mail-order (1.0%), commissaries (0.4%). Utility -operated (0.3%), and other types (1.2%).

B/ - Mostly mail-order (8.7%).

C/ - Mostly leased departments (7.0%).

D/ - Mostly utility-operated (36.8%) and direct-selling (6.4%).

E/ - Mostly direct-selling (2.2%) and commissaries (1.2%).

F/ - Revised from figure appearing in Vol. VI.

In the department store field the 1933 Census includes about 100 more chain stores than in 1929. A few of these are large stores opened by the mail-order houses and other chains which continued to expand after 1929; the balance represents principally the stores of a national chain classified in 1929 as a variety store chain, but which has changed the nature of its business during the intervening years until today it is classified properly as a department store chain. Its sales in 1929 were approximately $66,000,000; in 1933 $78,000,000*.

In comparison, the number of independent department stores decreased from 2,166 to 1,428. A factor in this decline is the minimum sales limit of $100,000 which is required of a store before it can be classified in the Census as a department store.

The number of chain department stores exceeds the number of independent department stores, although their sales are little more than one-third of the sales of independents. With the exception of a few sizeable stores of the mail-order houses, practically all of the large downtown department stores of the country are independently operated and are owned locally except for 121 stores of the ownership groups. Ownership groups are financial mergers of previously existing independently owned stores, without central merchandising and buying. Mere ownership does not classify them as chains so long as they are independently operated and their buying is not centralized. They are classified the same way in 1933 as in 1929. There were 13 ownership groups in 1933 with 130 stores and sales of $645,342,000, or 36 percent less than their sales in 1929.

*These figures have been published by The Company involved.

The trend toward combination food stores, (grocery stores with fresh meat departments) was pronounced in the period between 1929 and 1933. The movement toward the inclusion of meat departments in grocery stores started with the smaller chains in the years prior to 1929, and the larger chains were testing it out in relatively few stores at the time of the 1929 Census. Since then it has become the predominant kind of chain food store. The increase in chain ratio, from 32.2 percent in 1929 to 43.7 percent in 1933 without any material change in ratio in the grocery field, reveals the fact that the emphasis of chain activity in the food field has shifted from the strictly grocery type of store to the combination store. Table 3 A analyzes stores and sales by type.
Similar tables for each State are contained in Vol. VI.

SUMMARY BY TYPES OF OPERATION, 1933 and 1929

(Sales, payrolls and expenses below are stated in thousands of dollars)

	Independents			Chains

Section 6. - Distribution by Chains

The table appearing at the end of this section presents information on the number of chain organizations in the retail field, on retail stores operated by them and on their central offices. In addition to chain stores discussed above, the retail units operated by chains include a number of stores classified in type-of-operation tables with mail-order houses, utility-operated stores, and other types. This accounts for the differences between the totals of the chain table following this paragraph and the figures on chain stores analyzed in preceding paragraphs, and in tables by types of operation in this volume and volume VI of the series of final retail reports.

Central Office Data

The chain summary table shows that the number of retail chain organizations in 1933 was 5,546 as compared with 7,061 in 1929. It indicates that the central offices of retail chains made direct sales in 1933 amounting to $215,583,000 and employed 115,078 persons on full-time and 3,344 on a part-time basis in addition to 1,182 proprietors. The payroll of central offices aggregated $183,632,000; other expenses, not prorated to the stores, totaled $98,188,000. These central-office figures do not appear in other retail trade tables, and consequently are not included in State or United States totals of retail trade.

Retail Units Operated by Chains

In 1933 chain organizations operated 152,308 retail units with sales of $6,767,766,000. This compares with 159,638 retail units operated by chains in 1929 with sales of $10,740,385,000, thus registering a decline of 37 percent in sales. Of the total amount of chain sales in 1933 about 17 percent were made on credit.

In 1933 chains provided employment through their retail units to an average of 752,623 full-time employees and 233,361 part-time employees or a total of 985,984 employees, of which 68.4 percent were men and 31.6 percent were women. The total store payroll of chains in 1933 was $868,358,000, of which $59,789,000 was paid to part-time employees. Total store-operating expenses of the chains, including payrolls, aggregated $1,851,855,000, which includes $93,057,000 of central-office expense prorated to the stores. Stocks in the stores of chains at the end of 1933 aggregated $737,631,000 at cost.

Tables and Reports

The table which follows shows for 1933 similar information for chains in each kind of business in which chains operate. It also contains a comparison of the number of chains, number of units and amount of sales in 1929. Special reports are available for variety chains, department-store chains and drug chains. It is planned that a special summary report will be published containing a series of comparative tables analyzing briefly the more important data concerning many other classifications for 1933 and for 1929. Reference is made to a similar summary report issued in connection with the 1929 Distribution Census, entitled "Retail Chains".1/

1/ "Retail Chains", 270 pages, available from the Superintendent of Documents, Government Printing Office, Washington, D. C., price 20 cents.

SUMMARY OF RETAIL CHAINS IN 1933

Units, Sales, Employment, Payroll, Expense and Stocks

Census of American Business

(Group totals may include classifications not listed to avoid disclosure of individual operations)

(Sales, expense, stocks and payroll expressed in thousands of dollars)

Section 7. - Retail Trade by Size of Business

Analyses presented in Table 4A in this volume indicate that more than 64 percent of all retail stores in 1933 did less than $10,000 of business and accounted in the aggregate for 13.85 percent of total retail sales. In contrast, nearly one-half of the business was done in 85,531 stores whose annual sales exceeded $50,000 each, although they constituted only 5.6 percent of the total number of stores.

A summary of stores and sales by 10 size-groups follows:

Number of Stores and Sales by Size of Store
(Sales are expressed in thousands of dollars)

	1933				1929			
	Stores		Sales		Stores		Sales	
	Number	%	Amount	%	Number	%	Amount	%
Total	1,526,119	100.00	$25,037,225	100.0	1,543,158	100.0	$49,114,653	100.00
$1,000,000 or more	765	0.05	2,426,450	9.69	2,059	.14	6,061,827	12.34

less than 10,000	982,193	64.36	3,466,797	13.85	673,686	43.66	2,793,016	5.69

Comparison with 1929

The table above, presenting a comparison by size groups of stores and sales in 1933 and in 1929, conceals a remarkable parallel between the two years which is disclosed when adjustment is made for the 50 percent decline in sales volume.

In 1933, 64.36 percent of all stores did an annual business of less than $10,000. Using the $20,000 classification for 1929 the corresponding proportion of stores doing less than $20,000 in 1929 is 63.93 percent. The sales of these stores accounted for 13.85 percent of the total volume of business done in 1933, and for 14.73 percent of the total volume in 1929.

Stores of less than $50,000 annual volume in 1933 constituted 94.39 percent of the total number of stores in 1933 and did 52.13 percent of total sales in that year. In comparison, the stores of less than $100,000 in 1929 constituted 94.97 percent of all stores in 1929 and they did 54.83 percent of total sales.

Similar direct comparison can be made between classifications of $10,000 to $50,000, $50,000 to $100,000 and $100,000 to $500,000 in 1933, and classifications of twice those amounts in 1929. It is evident there has been no more than a minor shift of business from one size group to another. A summary follows:

	Percent of all Stores	
	Number	Sales
Stores of less than $10,000 in 1933	64. 6	13.85
Stores of less than $20,000 in 1929	63.93	14.73
Stores of $10,000 to $50,000 in 1933	30.03	38.28
Stores of $20,000 to $100,000 in 1929	31.04	40.10
Stores of $50,000 to $100,000 in 1933	3.65	14.96
Stores of $100,000 to $200,000 in 1929	3.21	14.70
Stores of $100,000 to $500,000 in 1933	1.82	19.48
Stores of $200,000 to $1,000,000 in 1929	1.68	19.13

Size by Kinds of Business

Although in general it is a correct conclusion that nearly two-thirds of all stores did less than $10,000 of business in 1933, and that their aggregate sales amounted to about one-seventh of total retail sales, there are many kinds of business to which these general conclusions do not apply, as is evident from Tables 4A and 4E in this volume.

The food group of stores, averaging in sales $14,331 per store, is predominantly a small store group, with 62.2 percent of all stores doing less than $10,000 per year and only 1.2 percent doing as much as $100,000 per year. Meat markets and combination stores show a larger proportion of stores over $10,000 than any other kind of business in the food field.

All department stores by definition exceed $100,000 of sales per store, whereas 51.1 percent of dry-goods and general-merchandise stores do less than $10,000 of business per year. Most of the sales (91.2 percent) of variety stores are done by the chains, but the remaining 8.8 percent is divided among 6,572 independent variety stores. Most if not all of the 4,778 variety stores doing less than $10,000 of business, are probably independent units.

Even among apparel stores more than one-half do less than $10,000 of business per store, but there is a considerable variation in this proportion in some kinds of business in the apparel field, particularly as between the men's stores, women's ready-to-wear specialty stores, family clothing stores, and shoe stores on the one hand and furriers, custom tailors and millinery shops on the other.

The great majority of filling stations; motor-supply houses and garages are in the small-store classification with sales of less than $10,000 per year per store. However, nearly 20 percent of all motor vehicle dealers do more than $100,000 of business per year each.

About 40 percent of furniture stores do less than $10,000 per year, but their sales are less than 6 percent of the total. Almost one-half of the business of furniture stores is done by 6 percent of the stores, with sales exceeding $100,000 each. Other classifications in the furniture group, however, are predominantly small stores of less than $10,000 of annual sales.

About 31 percent of all lumber and building material dealers report a business of less than $10.000 per year, although in aggregate the small yards do hardly more than 5 percent of the total business of lumber dealers. Other classifications in the lumber and building group show considerably more than 50 percent of their stores in the under $10,000 group. Even in the case of hardware stores 58 percent do less than $10,000 each of business per year.

Eating places in all classifications are essentially small-volume establishments with about 83 percent doing less than $10,000 per year and accounting for 35 percent of the total business.

Nearly 43 percent of all drug stores do less than $10,000 per year, but these small stores account for only 12 percent of drug-store sales. More than 1,000 drug stores do an annual business exceeding $100,000 per year.

Of 14,313 jewelry stores throughout the country, 10,506 done less than $10,000 of business annually and account for 22.8 percent of total jewelry-store sales. In contrast, 228 stores exceed $100,000 of annual sales and account for $49,226,000 or 28 percent of total sales. Four stores each did more $1,000,000 of sales in 1933.

It was indicated above that the years between 1929 and 1933 witnessed an appreciable change in the distribution of stores by size in favor of the smaller stores. The following tabulation by kinds of business reveals some interesting disparities in that movement as between the various kinds of business. The tabulation is found in figures from Table 4A in this volume and corresponding 1929 figures from tables 4A and 4B contained in the 1929 Retail Census Summary.1/

Percent of Total Stores in Store-Size Groups
by Kinds of Business

May		Total Stores	Under $10,000	$10,000 to $49,999	$50,000 to $99,999	$100,000 and over
Food group	1933	100.0	62.2	32.8	3.9	1.1
	1929	100.0	45.4	43.9	8.2	2.5
Restaurant group	1933	100.0	83.0	14.4	1.1	1.5
	1929	100.0	62.0	32.1	4.0	1.9
General merchandise group	1933	100.0	44.6	33.9	9.4	12.1
	1929	100.0	29.6	44.5	11.7	14.2
Apparel group	1933	100.0	51.4	40.1	5.5	3.0
	1929	100.0	34.7	48.0	11.0	6.3
Automotive* group	1933	100.0	68.2	22.4	4.8	4.6
	1929	100.0	42.5	33.0	10.1	14.4
Filling stations	1933	100.0	70.1	28.2	1.2	.5
	1929	100.0	54.0	41.5	3.7	.8
Furniture-household group	1933	100.0	55.3	35.5	5.7	3.5
	1929	100.0	31.9	45.9	13.1	9.1
Lumber-hardware group	1933	100.0	52.5	40.6	4.9	2.0
	1929	100.0	27.5	50.7	13.2	8.6
Farmers' supplies-	1933	100.0	58.7	35.9	3.9	1.5
Country gen'l. stores	1929	100.0	37.8	48.4	9.6	4.2
Drug stores	1933	100.0	42.8	51.2	4.0	2.0
	1929	100.0	17.8	70.5	8.9	2.8

*Excluding filling stations.

1/"Retail Distribution, Summary for the United States: 1929", obtainable from Superintendent of Documents, Washington: price 20 cents.

Full-time Employees and Proprietors

Table 4C presents an analysis of full-time employees and proprietors in the several size-of-business groups by kinds of business. No similar tabulation was made available in connection with the 1929 Census. The table shows that whereas the full-time employees are spread fairly evenly through the various size groups proprietors are numerically important only in the smaller stores. The information presented in that table becomes particularly illuminating when related to data on stores and sales contained in Table 4A. A summary of ratios based on the two tables is presented below:

	Percent of Total			Number per store		Number per $10,000 of Sales	
	Sales	Full-time Employees	Proprietors	Full-time Employees	Proprietors	Full-time Employees	Proprietors
Under $10,000	13.9	12.8	69.3	.4	1.1	1.00	3.14
$10,000-$19,999	14.5	14.0	17.1	1.5	1.0	1.04	.74
$20,000-$29,999	10.4	10.0	6.3	2.5	.9	1.03	.04
$30,000-$49,999	13.3	12.4	4.4	3.8	.8	1.00	.04
$50,000-$99,999	15.0	14.1	2.2	6.9	.6	1.02	.01
$100,000-$199,999	10.7	10.7	.6	14.3	.5	1.08	----
$200,000-$299,999	4.3	4.5	.1	26.6	.4	1.11	----
$300,000-$499,999	4.5	4.8	---	43.5	.3	1.17	----
$500,000-$999,999	3.7	4.0	-----	77.3	----	1.17	----
$1,000,000 and over	9.7	12.7	-----	451.0		1.42	----

The above summary shows that, except for the very small and the very large stores, the distribution of full-time employees among stores of various size groups follows fairly closely the distribution of total sales. This necessarily implies an increase in employees per store with an increase in its size in terms of sales volume, as is indicated in the second section of the summary. A more precise measure of the relationship of employment opportunity to sales volume is provided by the number of full-time employees per $10,000 of sales in stores of various sizes, as calculated in the third section of the summary.

This part of the summary appears to suggest that employment per dollar of sales increases with store size. The conclusion is accurate if limited to the employment of outside persons. It should be observed, however, that in the small stores, with the number of proprietors so great relatively to the number of employees, the total personnel per dollar of sales is much larger than in stores of large sales volume.

The summary above is based on data for retail trade as a whole. It conceals important differences in the relationships between stores, sales, full-time employees and proprietors which would become apparent if a similar analysis were carried through by kinds of business. An interesting illustration of this is the figure on full-time employees per $10,000 of sales in stores with annual sales of $1,000,000 and over. This figure appears to be entirely out of line with similar ratios for other size groups. A partial explanation of the difference is to be found in the fact that in the largest size group department stores account for about 75 percent of the full-time employees and 80 percent of sales.

State Figures

Table 4B in this volume presents information similar to that contained in Table 4A by States and geographic divisions. Tables similar to 4A by kinds of business for each State are contained in Volume VII.

Table 4D in this volume presents information similar to that contained in Table 4C by States and geographic divisions.

Section 8.- Retail Trade by Size of City.

Of the 1,526,119 stores shown for 1933, 19 percent are located in cities of more than 500,000 population; 7 percent in cities of 250,000 to 500,000 population; and 7 percent in cities of 100,000 to 250,000 population.

Thus there are 33 percent of the stores of the country in cities of more than 100,000 population. In comparison, there are likewise 33 percent of the stores in places of less than 2,500 population and in the unincorporated areas. Approximately the same number, or 34 percent, are in cities of 2,500 to 100,000 population.

In contrast to the almost equal division of stores in these three size-of-city groups, sales of the stores in cities of more than 100,000 population aggregated 46 percent of the total. An equal number of stores in areas of less than 2,500 population account for 18 percent of the retail business of the country. Cities included in the size range between 2,500 and 100,000, with 34 percent of the stores, did 36 percent of the total business. A summary follows:

U. S. Summary — Percent of Stores and Sales by Size of City.

City-Size Groups Totals; 1933	Percent of Population	Percent of Stores	Percent of Sales
	100.0	100.	100.
500,000 or more	17.0	19	26
250,000 to 500,000	6.5	7	11
100,000 to 250,000	6.1	7	9
All cities, 100,000 or more	29.6	33	46
75,000 to 100,000	1.8	2	3
50,000 to 75,000	3.5	4	5
30,000 to 50,000	3.9	4	5
20,000 to 30,000	3.2	4	4
10,000 to 20,000	5.6	7	7
5,000 to 10,000	4.8	7	7
2,500 to 5,000	3.8	6	5
All cities, 2,500 to 100,000	26.6	34	36
All other areas	43.8	33	18

Geographic Division

The accompanying tables show similar information for each of the nine geographic divisions of the country. There are wide differences in the various geographic divisions in the proportion of stores and sales by size-of-city groups and the information provides an unusual measure of the characteristics of each area.

Comparisons of the distribution of population and of sales by city-size groups, for the various geographic divisions, reveal the extent to which purchases at retail tend to shift to the larger cities from the smaller communities. Reference to city-size Table 3 on page 44 shows that in the Middle Atlantic States, for instance, the sales in each city-size group are almost identical with population in all size groups between 2,500 and 100,000; that above 100,000 there is uniformly a higher percentage of sales than of population. In the South Atlantic Division, however, a different situation is revealed. There is no city-

size group other than that below 2,500 in which the ratio of sales fails to exceed the ratio of population, showing that in the South Atlantic States the cities of all sizes are trading centers. There is no particular size of city which is greatly different from any other size in the relation between its own population and its proportion of retail business. The table permits of similar comparisons in the other geographic divisions.

The nine geographic divisions, and the States which they comprise are as follows:

NEW ENGLAND---	Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont.
MIDDLE ATLANTIC---	New Jersey, New York, Pennsylvania.
EAST NORTH CENTRAL----	Illinois, Indiana, Michigan, Ohio, Wisconsin.
WEST NORTH CENTRAL---	Iowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, South Dakota.
SOUTH ATLANTIC---	Delaware, District of Columbia, Florida, Georgia, Maryland, North Carolina, South Carolina, Virginia, West Virginia.
EAST SOUTH CENTRAL---	Alabama, Kentucky, Mississippi, Tennessee.
WEST SOUTH CENTRAL---	Arkansas, Louisiana, Oklahoma, Texas.
MOUNTAIN---	Arizona, Colorado, Idaho, Montana. Nevada, New Mexico, Utah, Wyoming.
PACIFIC---	California, Oregon, Washington.

An accompanying summary shows the percent of stores and sales as well as population, in each size-of-city group, for each geographic division. (Page 44)

Kinds of Business---Not Commodities

The following classifications by kinds of business are significant but are not interchangeable with commodity classifications. Food stores sell more than food, and food also is sold in other kinds of stores, including country general and department stores. Apparel, furniture and drugs are sold in many stores not classified primarily as apparel, furniture or drug stores. Commodity analyses were shown in the 1929 Retail Census but no commodity breakdown of sales was included in the 1933 Census. It should be noted that the range of commodities handled by stores in any given kind of business may vary with the size of the community in which the store is located.

Food Stores

Forty-two percent of all food stores are in cities of more than 100,000 population and 24 percent in places of less than 2,500 and unincorporated areas. The former do 45 percent of the food store business, whereas the small town and rural stores do 15 percent. A small number of beer-liquor is included.

Of all kinds of stores in cities of more than 500,000, 41 percent are food stores which account for 28 percent of the entire retail business in these large cities. In contrast, food stores constitute 23 percent of all retail stores in the areas under 2,500 population and they do 23 percent of all the retail business that is done in such areas. (Country-general stores account for a large proportion of food sales in such areas).

Eating Places

Thirty-eight percent of all eating places are in cities of 100,000 or more and they do 58 percent of the total restaurant business of the country. In contrast, 29 percent are in areas of less than 2,500 population and they do 14 percent of the restaurant business. Drinking places are included in this group.

Farmers' Supplies and Country-General Stores

In areas of less than 2,500 population are located 86 percent of all the farmers' supplies and country-general stores of the country and they do 75 percent of all the business done by such stores. Only 5 percent of the stores and 9 percent of the sales in this classification are in cities of more than 20,000 population. This classification includes general stores and farmers' supplies dealers.

General-Merchandise Stores

Thirty-one percent of all stores in the general-merchandise group are in cities of more than 100,000 population and they do 60 percent of the total general-merchandise business of the country. In comparison, 28 percent are in areas of less than 2,500 population and they do 6 percent of the business. The general-merchandise group includes department stores, variety stores, dry goods and general merchandise stores.

Apparel Group

Of the apparel group, which includes also shoe stores and accessories stores, 47 percent of the stores are in the cities of more than 100,000 population and they do 63 percent of the total apparel-store business of the country. Only 10 percent of the stores are in places of less than 2,500 population and they do only 3 percent of the total business of apparel stores. Apparel, however, is sold in stores other than apparel stores. It is an established fact that stores in the larger cities of an area tend to attract a dispropo.-tionate volume of the better apparel business, because of the greater variety of selection afforded by their larger stocks, and the alleged superior timeliness of their fashions. Again it is emphasized that the kind-of-business classifications are not interchangeable with commodity classifications.

Automotive Group

Of the 135,000 automotive establishments (except filling stations) in the country 24 percent are in cities of more than 100,000 population, where 37 percent of the total business is done. In comparison, 39 percent are in places of less than 2,500 population and they do 18 percent of the total automotive business (except filling stations). Motor vehicle sales agencies, garages, tire and battery shops and automobile accessory dealers are included in this group..

Filling Stations

There were 170,404 filling stations in 1933, of which 53 percent were in places of less than 2,500 population and in unincorporated areas. In contrast to other kinds of retail business, 31 percent of the entire filling station business of the country was done in these small towns and rural areas. This is slightly greater than the entire business done in all cities of more than 100,000 population, in which there were only 17 percent of the filling stations. A few retailers of fuel oil for domestic consumption are included.

Furniture and Household Appliances

Of the furniture and household-appliance group of nearly 43,000 stores, 34 percent are in cities of more than 100,000 population and they do 54 percent of the total business of this group of stores. Twenty-two percent of such stores are in the small areas of less than 2,500 population and they do only 8 percent of the total business of this classification. Floor coverings and radio stores are included in this group.

Lumber and Building Materials Group, including Hardware Stores

Twenty-six percent of the lumber and building material dealers of the country are located in cities of more than 100,000 population and they do 28 percent of the total lumber and building material business. A similar proportion is done in small towns and rural areas of less than 2,500 population, in which are located 38 percent of the total number of dealers. This group includes dealers in lumber, hardware and farm implements, plumbing, electrical, paint and other building supplies.

Drug Stores

The large cities of more than 100,000 population include 39 percent of all the drug stores of the country, in contrast to 29 percent in the towns and areas of less than 2,500 population. However, their sales aggregate 48 percent of the total drug store business of the country in comparison with 15 percent in the rural areas.

Comparison with 1929 - Total Stores

Comparison of the 1933 analysis with that of four city-size groups for 1929 discloses that there has been practically no shift in the proportion of stores in community groups of various sizes. Nor has there been any material change in the proportion of sales in the larger cities as compared with cities of 10,000 to 30,000, cities of 5,000 to 10,000 and communities smaller in size than 5,000. Within one percent, each accounted for the same proportion of the total retail business of the country in 1933 as it did in 1929.

Cities of more than 30,000 population in 1933 contained 43 percent of the stores and accounted for 59 percent of the total retail business of the country. In 1929 the same cities contained 44 percent of the stores and accounted for 58 percent of the total business.

Cities of 10,000 to 30,000 population contained 11 percent of the stores in 1933 and 11 percent in 1929. They account for 11 percent of all retail sales in 1933 and 12 percent in 1929.

Cities of 5,000 to 10,000 population contained 7 percent of the retail stores in 1933 and 7 percent in 1929. Likewise, they account for 7 percent of retail sales in 1933 and 7 percent in 1929.

Incorporated cities and towns of less than 5,000 population and unincorporated areas, contained 39 percent of all retail stores in 1933 and 38 percent in 1929. These stores accounted for 23 percent of retail business in 1933 and 23 percent in 1929.

Comparisons between 1933 and 1929 for the several size-groups below 5,000 population cannot be shown, for the reason that the 1929 classification by size (page 178, United States Summary of Retail Distribution) includes a number of unincorporated communities which in 1933, being unincorporated, were classified as "other areas" and grouped with incorporated towns of less than 2,500 population. A summary follows:

Comparison, Stores and Sales by City-Size Groups, 1933 and 1929

	Population	Stores				Sales (Millions of dollars)			
		1933		1929		1933		1929	
	1930	Number	%	Number	%	Amount	%	Amount	%
Totals	100.0	1,526,119	100	1,543,158	100	25,037	100	49,115	100
Over 30,000	38.8	667,448	43	683,751	44	14,600	59	28,486	58
10,000 - 30,000	8.8	160,058	11	164,462	11	2,980	11	5,814	12
5,000 - 10,000	4.8	99,943	7	104,390	7	1,642,	9	3,272	7
Under 5,000	47.6	598,670	39	590,555	38	5,815	23	11,542	23

Comparison with 1929 by Kinds of Business

The comparison of sales by city-size groups in 1933 and 1929 for each kind-of-business classification disclosed few variations. Some of them, however, are of interest. Note, for instance, in the lumber-building and hardware group the increased importance of sales in small towns and rural areas. A summary follows:

Sales of Each Business Group, by Size of City---1933 and 1929

Kind-of Business Groups	Sales, in Millions of Dollars											
	Cities over 30,000-				Cities of 10,000 to 30,000				Places under 1000			
	1933		1929		1933		1929		1933		1929	
	Amt.	%	Amt.	%	Amt.	%	Amt.	%	Amt.	%	Amt.	%
All stores	14,600	59	28,486	58	2,980	11	5,814	12	7,458	30	14,814	30
Food stores	3,990	59	6,472	60	879	13	1,399	13	1,924	28	2,967	27
Eating places	968	68	1,514	71	131	9	194	9	331	23	417	20
Farmers-Country	106	7	235	6	89	6	160	4	1,366	87	3,295	90
Gen'l. mdse	2,847	73	4,810	45	441	11	706	11	603	16	928	14
Apparel Stores	1,505	78	3,299	78	210	11	468	11	208	11	474	11
Automotive (except F.S.)	1,486	52	3,968	51	421	15	1,187	15	981	33	2,664	34
Filling stations	548	43	738	41	191	12	232	13	693	45	818	46
Furniture & H.H.	662	69	1,922	70	118	12	337	12	179	19	496	18

Drug stores	649	61	992	59	128	11	202	12	289	28	496	29
Other stores	1,213	74	3,333	65	181	11	555	11	258	15	1,214	24

Retail Characteristics of Cities

It is possible to obtain from the accompanying tables a measure of the retail characteristics of the cities in each size-class in the several States---that is, the proportion of the stores that are food stores, the proportion that are apparel stores, etc., and the proportion of total retail business done by each kind of store.

The largest cities contain the greatest proportion of food stores, and 41 percent of all stores in such cities are food stores. In the areas of less than 2,500, the proportion of food stores drops to 23 percent; but country-general stores replace them, so that food stores and country-general stores combined constitute the same proportion of total stores as in the largest cities, or 41 percent. Food stores in the largest cities account for 28 percent of the total retail business in such cities, whereas their proportion in the small Communities is 23 percent. At least one-half of country-general stores sales represents food; the 23 percent for food stores is thus increased to 36 percent, or more, which is a conservative measure of the proportion of retail business in the small communities representing the sale of food. Typically, food stores constitute about one-third of the total number of stores in an average city and they do about 30 percent of all retail business in such cities.

Restaurants typically constitute 13 to 14 percent of the number of retail stores and they account for about 5 perdent of the total retail business of the average city. The smaller the city the smaller the proportion of retail business which is accounted for by the restaurants; on the other hand, in the largest cities restaurant sales represent 8 percent of all the retail business.

General-merchandise stores typically represent about 3 percent of the stores, but they account for 16 to 18 percent of the total retail business. This proportion falls off rapidly in cities below 10,000 population, where the proportion of stores is no less but their sales average only 5 percent of the total sales in the small towns and rural areas.

Apparel stores constitute as much as 9 percent of all stores in the larger cities and in characteristic cities of 30,000 to 100,000 they average 8 percent of all stores. Typically, they account for 9 to 10 percent of total retail business in the average city, but only 1 percent in areas under 2,500 population (This is the measure of apparel store sales, not of apparel sales).

Both motor vehicle dealers and filling stations increase in relative importance to other business in inverse proportion to population. In the largest cities they contitute 6 percent and 4 percent respectively of all retailers, and together they do 11 percent of the business. In cities between 30,000 and 100,000, the automotive group accounts for 16 to 18 percent of all retail places of business, equally divided between filling stations and other automotive. Filling stations in such cities do 6 percent of the total retail business of those cities, and the remainder of the automotive group (principally motor vehicle dealers) do 12 to 13 percent. In areas of less than 2,500 population, filling stations constitute 18 percent of all retail places of business and account for 11 percent of the entire retail sales in such areas, with the remainder of the automotive group accounting for 12 percent.

The furniture and household group in typical cities constitutes 3 percent of all retail stores and accounts for 4 to 5 percent of all retail sales in such cities.

Lumber and building material dealers in cities of 30,000 to 100,000 account for 4 to 5 percent of all retailers and the same proportion of sales.

Drug stores, almost without regard to the size of the community, constitute 4 percent of all retail stores and account for about 4 percent of all retail sales.

Following are tables showing for the United States and for each geographic area the number of stores and sales in each size-of-city group, and tables showing similar information for each State.

Section 9.- Sales by Retailers Versus Merchandise Sales at Retail

The great majority (97.2 percent) of retail sales represents the sale of merchandise and meals, but retailers also derive a part of their gross income from repairs, service and ther non-merchandise sources.

Table 7A (page A-25) presents an analysis of sales by kinds of business to show merchandise sales, the sale of meals, income from repair and service and other income. Table 7B (page A-26) shows the same data by States. A summary follows:

Total sales by retailers in 1923,	$25,037,225,000
Merchandise sales	22,867,406,000
Sale of meals	1,514,424,000
Repair and service	567,767,000
Other sources of income	87,628,000

Wholesale Sales

In addition to an analysis of sales, Table 7A and 7B show the amount of sales by retailers to other retailers, aggregateing $461,659,000 in 1933. Most of this amount may be regarded as "wholesale" business, in the sense that it is for resale and appears again in other retailers' sales.

Offsetting this is an item of sales by wholesalers to ultimate consumers. Table 8A (page A-27) presents a summary of wholesalers' sales to ultimate consumers by kinds of business as classified by the Wholesale Census, and Table 8B by States, amounting in aggregate to $585,945,000.

Service Sales

Retailers' receipts from repairs and service, aggregating $567,767,000 in 1933, are offset to some extent by the sale of merchandise and meals by service establishments, places of amusement and hotels. Table 9A (page A-28) presents an analysis taken from the Service Census showing the nature of the receipts of all service establishments, places of amusement and hotels reported in the Service Census of 1933, by kinds of business; Table 9B (page A-29) shows similar information by States.

Section 10. - Comparison: 1933 and 1929

Although comparisons with 1929 have been used frequently in preceding Sections to weigh the significance of 1933 data, a clearer understanding of what has happened to retail distribution in the four years of severe depression is of sufficient importance to require a separate Section.

Total sales declined 49 percent between 1929 and 1933. During the latter months of 1929 most kinds of retail business suffered no material losses in sales volume. so the year was reasonably consistent throughout. Available indexes of yearly sales are limited, but they indicate that sales in 1929 were the highest of any previous year. This conclusion is based upon Federal Reserve Reports, published sales figures of representative chains and independent stores and studies conducted annually by several universities and by national trade associations. Sales were not greatly affected except in a few luxury lines, by the stock market crash in 1929 until about the middle of 1930. The year, 1933, on the other hand, is a composite of two entirely dissimilar situations. The first quarter of the year was a continuation of the downward spiral in sales, prices, margins and profits, that started early in 1930 in the retail field. The second quarter of 1933 saw a revival of hope, a marked increase in the number of new enterprises, the start of a general price increase, and some improvement in sales.

The third quarter of 1933 was characterized by a considerable amount of speculative buying both by retailers and consumers, in anticipation of higher prices actuated by processing taxes and higher wage rates as a result of the program for industrial and agricultural recovery. This quarter marked the beginning of substantial increases month by month in retail sales, which continued throughout the remainder of 1933 and the subsequent year.

In view of these facts it is impossible to regard 1933 as a whole as measuring the bottom of the depression. Apparently that point was reached in one of the early months of 1933. Employment, the only item of importance collected on a monthly basis, suggests that the low point was reached in February or March. It is impossible to measure the sales of the first quarter of 1933 and no official data are available on sales for 1932, but all estimates place sales volume in 1932 at a figure higher than in 1933.

Despite the fact that conditions were far from uniform throughout 1933, as described above, the year may be regarded as marking the low point of sales volume since 1929. It is well established by Federal Reserve figures and estimates by the Bureau of Foreign and Domestic Commerce based upon representative samples, that sales in 1934 exceeded those for 1933 by about 12 percent.

Below is a summary comparison of stores, sales, employment, and payrolls for 1933 and 1929 showing the percent of change for the United States as a whole:

RETAIL DISTRIBUTION, 1933 and 1929 (United States)

	1933	1929	% of Change
Number of stores	1,526,119	1,543,158	- 1.1
Total sales	$25,037,225,000	$49,114,653,000	-49.0
Number of full-time employees	2,703,325	3,833,581	-29.5
Number of part-time employees	730,327	569,359 1/	+28.3
Number of proprietors (actively engaged in their stores but not on payrolls)	1,574,341	1,510,607	+4.2
Payroll:			
Total	$2,910,445,000	$5,189,670,000	-43.9
Full-time	2,664,447,000	5,028,282,000	-47.0
Part-time	245,998,000	161,388,000	+52.4
Average annual earnings per full-time employee	$986	$1,312	-24.9

1/ The number of part-time employees in 1929 as published for that year were computed on the basis of mean average, not strictly comparable with the monthly average used for 1933. The figures herein have been adjusted.

Table A, for the United States, presents a comparison between 1933 and 1929 of stores, sales, employment, payroll and stocks by 39 principal kinds of business, and a second section of Table A presents the same information by States.

Tables similar to Table A are included for each State.

Section 11. - New and Old Stores in 1933

At the close of 1933, there were in the United States 1,526,119 retail stores, which reported a volume of business during the year of $25,037,225,000. Of these 548,253 or 35.9 percent had come into existence since 1929, the year for which the first Retail Census was taken. These 548,253 new stores reported a volume of business of $5,094,302,000 or 20.4 percent of all retail sales during 1933. They were conducted by 582,802 proprietors and further provided 6,667,248 man-months of full-time employment for which $534,192,000 was paid in salaries and wages, exclusive of any return or compensation for the services of proprietors.

The classification of "new" stores is based on a negative answer to the question carried on the 1933 schedule whether the store was in operation in 1929. In tne nature of the case a new store may therefore mean change in ownership or in location as well as those established since 1929. Nor does the number of new stores necessarily indicate a new addition to the stores in operation in 1929, for a certain proportion of the latter had disappeared by the time the 1933 census was taken. Disappearances of retail stores, which can be deduced from the Census figures by comparing the number of "old" stores reported for 1933 with the total number reported for 1929, are analyzed in volume IV of the series of final retail reports.

Tables 6A, 6B and 6C present an analysis of retail data for stores classified by date of establishment into three groups: Those established prior to or in 1929, those organized in 1930-32 and those which came into existence in 1933. The latter group is further classified by the four quarters of 1933. Table 6A contains information on the number of stores and sales by kinds of business. Table 6B sets forth the same information by States and geographic divisions. Table 6C presents additional items on number of proprietors, number of full-time employees, the amount of payroll, and the amount of reported expenses (including payroll but excluding proprietors' compensation) by States and geographic divisions.

New Stores by Date of Establishment

More than 352,000, or 64.2 percent of the 548,253 stores which came into existence since 1929, were established in the three-year period prior to 1933; this represents an annual average for that period of 117,340 as against 196,232 new stores in the year 1933. The average number of stores which began operations was 28,535 per quarter during the period from January 1, 1930 to March 31, 1933, inclusive, while for the last 9 months of 1933 the average of new stores rose to 59,100 per quarter, more than twice the previous average. Obviously, the figures for the period preceding April, 1933, are somewhat understated, since a number of new stores which began operations during that time were probably no longer in existence when the 1933 Census was taken. Nevertheless, the comparison is indicative of the renewal of courage which marked the second quarter and preceded a sharp rise in retail sales during and subsequent to the third quarter of 1933.

New Stores and Their Sales by Kinds of Business

The new stores accounted on the average for nearly 36 percent of the total number of stores in 1933 and for somewhat over 20 percent of retail sales in that year. It is unsafe, however, to generalize from averages of this type. An analysis by major kind-of-business groups discloses an unusual amount of variation in the relative importance of new stores

and their sales. As the following summary shows the percent of new stores was in some kinds of business as high as 58 and in others are low as 16, while the proportion of sales varied from a minimum of 9 percent to a maximum of 39 percent.

Percent of Stores, and Sales in Old and New Stores

Major Kind-of-Business Groups	Stores by Date of Establishment				Sales in Stores Established			
	Total	In 1929 or before	1930-32	1933	Total	In 1929 or before	1930-32	1933
Food	100.0	65.2	24.1	10.7	100.0	75.2	21.6	3.2
Restaurant	100.0	42.0	26.7	31.3	100.0	61.0	23.0	16.0
General Merchandise	100.0	75.6	17.1	7.3	100.0	91.2	7.2	1.6
Apparel	100.0	65.9	22.9	11.2	100.0	76.6	18.7	4.7
Automotive	100.0	56.9	29.2	13.9	100.0	72.4	22.9	4.7
Furniture-household	100.0	74.6	17.9	7.5	100.0	86.0	11.1	2.9
Lumber-hardware	100.0	83.8	12.2	4.0	100.0	90.3	8.2	1.5
Farm	100.0	83.6	12.3	4.1	100.0	89.1	9.2	1.7

A comparison of the percentages for sales with those for stores indicates clearly that the new stores are smaller in terms of sales volume than those which were in existence as early as 1929. This holds not only for stores which were established in 1933, and were not therefore operating during the entire census year, but also for stores which began operations sometime in 1930-32. The sales percentages for the 1930-32 column are consistently lower than the corresponding store percentages. The analysis by kinds of business tends therefore to confirm the conclusion that can be drawn from the following figures on average sales per store; for stores in operation in 1929 and in 1933 - $20,394, for stores established in 1930-32 - $11,787, for stores which came into existence in 1933 - $4,816.

Proprietors and Full-time Employees

Evidence to the effect that the new stores are on the average smaller than those which survived since 1929 is also to be found in data on proprietors and full-time employees. In section 7 of this chapter an analysis was made indicating that the number of proprietors per store is considerably greater for the small stores than for the large units. It is interesting therefore to observe that the number of proprietors per store is on the average 1.01 for stores which survived since 1929, 1.03 for stores established in 1930-32, and 1.13 for stores which came into existence in 1933. The number of full-time employees per store for the same classes is 2.20, 1.27 and 0.56, respectively.

Reported Expense and Payroll

Reported expense includes the payroll and other operating expenses; it does not allow, however, for the compensation of the proprietor. The figure as it stands can scarcely be used for comparison purposes between old and new stores, because of the unequal importance of proprietors' services; it is also uncertain whether the expense reported for stores established in 1933 is based on a proper accounting of deferred charges and expenses incurred but not paid. It is of interest nevertheless that the rate of reported expenses (less payroll) to sales is 26.3 percent for stores established in 1929 or prior years, 24.2 percent for stores organized in 1930-32 and 26.5 percent for stores which came into existence in 1933. The relatively higher expense rate for the stores established in 1933 undoubtedly reflects the inclusion of organization expenses in the reported expense figure as well as the comparatively low level of sales in the initial period of the stores' existence.

CHAPTER II. - DEFINITIONS AND DESCRIPTION OF TERMS

This chapter is in two parts. The first part contains a description of the various kind-of-business classifications used in the 1933 Census. Since comparability with the results of the 1929 Retail Census was sought, the descriptions follow for the most part those developed in dealing with kind-of-business data for 1929 and presented in Distribution, Volume I, Part I, Chapter II. The second part is given to general description of terms used in the Retail Census, such as stores, sales, employees, and the like.

KINDS OF BUSINESS

In 1929 kind-of-business classifications comprised 167 groups. In 1933 they were combined into 50 groups and two new groups were added to take care of beer and liquor stores and drinking places. Reduction in the number of groups was motivated, apart from considerations of cost, by the absence of information requisite for detailed classification. The schedule for 1933 did not call for a breakdown of sales by commodities so that the classification of a particular store into this or that kind of business group was based entirely on the response to inquiry 2 - the usual name or designation of the store - and the list of principal lines of goods sold or handled, arranged in the order of their sales importance. Even with the broader groups used in 1933 there is no assurance that in every instance the classification of a store was identical with that followed in 1929.

Food Group

Candy and confectionery stores.---In this combined classification are two distinct kinds of stores. The first is the candy store or candy and nut store, confining its business primarily to the sale of boxed or bulk candies and nuts or to either of the two commodities, and the second is the confectionery store, selling also other types of confections and dispensing fountain drinks and ice cream. A present trend of confectionery stores is to add lunches and prepared foods, after the manner of the delicatessen store.

Dairy products-stores (including milk dealers)---Under this classification are three related kinds of business; first, the dairy products stores; second, egg and poultry stores; and, third, milk dealers. Dairy products stores handle dairy products, including milk, eggs and poultry. Egg and poultry stores likewise handle dairy products, although they do not usually maintain a complete line. Milk dealers often handle other dairy products, particularly butter and cheese, and sometimes eggs.

Delicatessen stores.---These stores confine their sales principally to cooked meats, prepared salads, cheese, and other prepared foods suitable for immediate table use. Often they also carry a limited stock of canned and bottled goods, groceries, and frequently beer and wine. Neighborhood delicatessen stores frequently carry fresh fruits and vegetable and some candies, confections, cakes and other bakery products, as well as milk and other dairy products. Often they serve lunches, and sometimes develop a substantial restaurant business.

Fruit stores and vegetable markets.---While these stores and stands are more often found in public of municipal markets, many neighborhood stores in large cities confine themselves entirely to the sale of fruits and vegetables.

Grocery stores (without meats)---This is the store popularly known as a grocery store, selling a full line of groceries, usually with fresh vegetables and popular fruits in season. They may carry smoked meats in limited quantities without changing the classification, but not fresh meats. Grocery stores which carry fresh meats are classified as combination stores.

Combination stores (groceries and meats)---This term covers two different kinds of stores: first is the grocery store which has added fresh meats to its grocery stock; second is the meat market which has added staple groceries. Both usually carry fruits and vegetables and bakery products and many are complete food markets. In some States they have become large distributors of cigarettes.

Meat markets (including sea foods).---Markets selling principally fresh and smoked meats and usually fish. Fish markets are included in this dual classification. In inland cities and towns, fish markets are rare, but in the sea-board cities there are a number of strictly fish and sea-food markets.

Bakeries-caterers.---Bakery goods stores included herein do not ordinarily produce the goods which they sell. In many instances the small bakeries which bake their own products but sell only at retail to neighborhood consumers are included. The larger producing bakeries are included in the Census of Manufactures. Caterers, also included herein, arrange special menus for luncheons and dinners to be served elsewhere, prepare and serve the foods. This is a specialized business in which service plays an important part.

Other food stores.---This classification includes stores and house-to-house distributors selling coffee, tea and spices; stores handling products of the farm which do not come within the classification of dairy products and fruit and vegetable stores; stores handling special health foods; and retailers engaged predominantly in the sale of bottled non-alcoholic beverages, including table or mineral water.

Bottled beer and liquor stores.---These stores specialize in the sale of bottled beer, ale and wine, and/or in the sale of liquors defined in most States as alcoholic or intoxicating beverages. The former (beer, ale, wine) came into legal existence on or after April 7, 1933 and the latter (liquor stores) after December 5, 1933. In most States they play little or no part in the 1933 sales volume. Bottled beer, wine and liquor is sold in quantity in other kinds of stores, including food stores, department stores, cigar and drug stores.

Farmers' Supplies and Country General Stores

Country general stores.---These stores, nearly always located in places of less than 10,000 population, corresponding roughly to the classification known as general merchandise stores in the larger cities. They handle foods which constitute an important part of their sales, and a general line of other merchandise, including dry goods, notions, clothing, and a limited line of shoes.

Farmers' supply stores.---Under this heading are included feed stores, coal-and-feed stores, grain elevators selling at retail, stores specializing in seeds and nursery stock, fertilizer stores dealing principally in fertilizer, harness shops and cooperages. Dealers in irrigation and drainage equipment and ranchers' supplies are included here, but dealers in farm implements are covered in the group "hardware and farm implement stores."

General Merchandise Group

Department stores.---are departmentized general merchandise stores, usually of the full service type, carrying men's, women's, and children's apparel, furnishings and accessories, dry goods, home furnishings, and many other lines. Shoes, furniture and hardware are often but not necessarily represented, although home furnishings, draperies, curtains, and linens are almost invariably carried. Some department stores also have food departments. For purposes of this Census, any departmentized stores having annual sales of less than $100,000 have been classified as general merchandise stores.

This group includes also mail-order houses selling general merchandise by mail. They carry about the same range of merchandise as do the department stores, and in addition sell farm implements and farmers' supplies, hardware, automotive equipment, and many other lines. Goods are delivered by mail, freight, or express, often at the cost of the purchasers, particularly in the case of bulky merchandise. These houses sell largely for cash, but extend some credit in the form of installment accounts. Data on mail-order houses as distinct from department stores may be found in Volume VI of the final series of retail reports. Department stores owned by the mail-order companies are classified as department stores and not as mail-order houses.

Dry goods stores.---Dry goods stores sell women's ready-to-wear and accessories: a general line of dry goods, such as linens, piece goods, house furnishings, notions, etc., and some home wares.

General merchandise stores.---The general merchandise classification includes, for the purpose of this Census, departmentized general stores having annual sales of less than $100,000, as well as non-departmentized stores with annual volume of over $100,000 selling similar lines of merchandise. In general merchandise stores, dry goods, household furnishings and appliances, and men's, women's, and children's apparel, furnishings, and accessories predominate. Army and Navy goods stores, also included herein, sell much the same variety of merchandise although in a lower price range. Clothing, shoes, camp equipment, blankets, and bedding predominate, and a limited stock of hardware is often carried. This group includes also women's exchanges, which carry a general line of merchandise, especially home prepared foods and handicraft.

Variety, 5-and-10 and to-a-dollar stores.---These stores carry a variety of small wares, especially the cheaper grades of women's accessories, light hardware, toys, housewares, etc. Sales are usually for cash, without delivery service. The 5-and-10 and to-a-dollar stores are usually operated by chains of sectional and national scope and have become large distributors of candy, hardware, notions, tableware, costume jewelry, cosmetics, and toys. In many variety stores, fountain sales, ice cream, and lunches constitute appreciable sales items.

Apparel Group

Men's stores.---Under this heading are included men's and boy's clothing stores, haberdashery stores, confining their sales to men's furnishings and accessories, men's clothing and furnishing stores, and hat stores. Men's stores may sell shoes.

Family clothing stores.---These stores carry clothing, furnishings, and accessories for men, women, and children, usually including shoes. Characteristic of many family clothing stores is their use of installment credit as a sales inducement.

Women's ready-to-wear specialty stores.---Women's apparel and accessories, usually including millinery, shoes, lingerie, hosiery, and small wares are sold in these stores. Frequently gloves, handbags and other leather goods are carried and toiletries and other lines related to women's apparel. This classification frequently includes large stores of sales importance equal to department stores but limited to women's wear, accessories, and dry goods.

Furriers-fur shops.---These shops usually sell ready-made fur coats, fur scarfs and fur trimmed cloth coats, but some shops also do custom work. Repairs and storage constitute a substantial source of income. However, when receipts from these sources amount to two-thirds of the total the store is classified as a service establishment, and does not appear in the Retail Census.

Millinery stores.---These atores sell ready-made and custom millinery and trimmings. They are frequently operated as leased departments in women's apparel and department stores.

Custom tailors.---These shops sell made-to-order clothing, men's or women's. Repairs constitute an item of income, but if receipts from repairs exceed those from custom tailoring, the shop is classified with cleaning, dyeing and pressing shops, which are shown in the Service Census.

Accessories and other apparel stores.---Under this heading are included blouse shops, corset and lingerie shops, hosiery shops, knit-goods shops, costume accessories stores (selling bags, jewelry, and gloves), umbrella shops (selling umbrellas, parasols, and canes), children's specialty shops (clothing and accessories), infants' wear shops (infants' wear and specialties), and mail-order apparel, stores selling men's and women's apparel, furnishings and accessories by mail from catalog.

Shoe stores.---This classification is divided into three kinds of stores; it includes stores selling men's shoes only or women's shoes only, as well as stores selling men's, women's and children's shoes. Men's shoe stores usually sell also hose and often gloves, and women's shoe stores are rapidly developing the sale of hosiery, bags, gloves, and underwear.

Automotive Group

Motor-vehicle dealers (new and used).---This group includes retail dealers in new and used cars and trucks. Dealers specializing in new automobiles and commercial vehicles usually carry stocks of replacement parts and accessories and maintain repair departments to take care of free new-car service, as well as subsequent repairs from which income is derived. Limited quantities of tires and batteries are carried, the sale of which is included. Large establishments often add to their income by utilizing unused floor space for storage. These

sources of additional business are negligible in their effect upon the total sales volume in this classification, which is predominantly the sale of new motor vehicles. Used-car dealers handle a variety of automobile makes but they carry as a rule, no stock of parts. Frequently a limited stock of new tires, tubes, and batteries is carried. A repair department is usually maintained to place the used cars in salable condition, and to service and repair the cars after sale. The income derived from repairs has little effect upon total receipts, which accrue chiefly from the sale of used cars.

Accessories stores, tire and battery shops.---This classification includes stores handling all kinds of automobile accessories, tires and batteries with or without a service department. It includes also tire shops selling new and used tires and tubes and maintaining vulcanizing facilities for tire repairs. When receipts from service exceed two-thirds of the total the shops are classified as service establishments and not as retail stores.

Filling stations.---This group includes filling stations and a few retail distributors of fuel oil. All filling stations sell gasoline and oil and usually maintain lubricating facilities; some of them sell also tires and provide emergency tire-repair service. While others sell in addition, other merchandise, such as lunches and refreshments, candy, tobacco, or groceries. This classification also includes superservice stations, combining in one establishment a number of services to motorist, often sponsored or owned by a tire company or a large oil company. When the proceeds from repairs exceed two-thirds of total receipts these places of business are regarded as service establishments.

Motorcycles-bicycle dealers.---This group includes shops selling motorcycles, new and used, and incidental parts and accessories; shops selling motorcycles and bicycles, their parts, accessories and supplies, and doing a considerable volume of repair business; and bicycle shops, handling bicycles, parts and accessories and bicycle repairs. If income from repairs exceed two-thirds of retail receipts, the shop is regarded as a service business.

Garages and repair shops.---Despite the similarity in name to the classification in the 1929 Census, this group in 1933 was defined to include only one of the four sub-groups listed under this heading in 1929, namely repair garages. Body, fender and paint shops, parking garages and radiator shops appear in 1933 as classifications in the Service Census. Repair garages sell gas, oil and accessories in addition to making mechanical repairs and body repairs. Receipts from storage sometimes add to the income of garages. Washing and lubrication service is frequently provided, but most of the income is from repairs, new parts, gasoline and oil.

Other automotive establishments.---Under this heading are included establishments selling aircraft and accessories, as well as those selling motor boats, yachts and canoes. Both of these kinds of business usually provide repair service.

Furniture-Household Group

Furniture stores.---The furniture store carries furniture, floor coverings, radios, draperies, curtains, household appliances and other home furnishings. A large proportion of the sales of these stores is on the installment plan. In the smaller cities furniture stores often carry hardware. In some cases they are combined with undertaking establishments.

Floor coverings, draperies, and upholstery stores.---Two kinds of stores are included; floor coverings stores, and drapery stores which also carry curtains and upholstery materials. Part of the income of drapery stores is often for service, usually upholstery service and the making of curtains and draperies.

Household appliance stores.---This group includes stores selling electrical and/or gas household appliances, electrical and gas refrigerators and stoves and ranges. Nearly one-half of the stores in this classification are operated by public utility companies selling appliances and accessories adaptable to their particular utility, while the independently operated appliance stores frequently confine their sales to a limited number of Nationally advertised lines of appliances. The larger appliances are usually sold on the installment plan. A large volume of appliance sales by hardware and department stores is not included, of course, under this heading.

Other home furnishings and appliance stores.---Under this heading are stores selling antique furniture with used furniture, retailers of brushes and brooms, stores selling pictures and frames, aluminum ware retailers (usually house-to-house selling organizations), china, glassware, crockery, tinware and enamelware stores, interior decorators, lamp and shade shops and shops selling awnings, banners, flags, window shades and tents. Included also are antique shops which sell authentic antique furniture and objects of art at retail.

Radio stores.---This classification covers radio and electrical shops frequently selling also related lines of merchandise, usually providing repair service and sometimes the servicing of other types of electrical appliances; included also are radio-and-music stores selling radios, various musical instruments, sheet music and music rolls, and service. When receipts from the sale of service exceed two-thirds of total receipts, the store is classified as a service establishment and not a retail store.

Lumber, Building and Hardware Group

Lumber and building material dealers.---Under this heading are grouped yards selling lumber and other building materials, lumber yards also carrying builders' hardware and retail dealers specializing in one line of materials such as roofing, asbestos products, brick and tile, building stone, cement, class, granite and marble, lime and plaster, nonmetallic roofing materials, sand, gravel and crushed stone.

It is emphasized that because of the number of dealers who combine retail and wholesale it is essential to consider also the Wholesale Census in any study of the building material field.

Electrical shops (without radio).---These shops sell lighting fixtures, incandescent lamps, heating and cooking appliances, cable, outlets and boxes. They also do some installation jobs and make electrical repairs; when receipts from repairs exceed two-thirds of total sales such shops are classified as service establishments.

Heating and plumbing shops.---Under this heading are stores selling heating appliances, plumbing, heating, and ventilating supplies, including fixtures, and dealers in oil burners and air-conditioning equipment. The two latter groups are increasing in importance in this field. Changes for installation and minor repairs are a source of income; service receipts,

however, cannot exceed two-thirds of the total for in such cases the establishment is regarded as a repair shop and transferred to a classification in the Service Census.

Paint and glass stores.---This classification covers glass and mirror shops as well as paint and glass stores. The former sell framed mirrors in addition to glass of all descriptions, and resilver old mirrors, while in the latter in addition to paints, varnishes, and lacquers and glass, wall paper is sold in considerable quantities.

Hardware stores.---This classification is confined to stores carrying a line of hardware and tools for general use, builders' hardware and electrical goods, as well as paints and painters' supplies. The modern hardware store is developing a greater and greater diversification of merchandise and is adding many related lines, such as radios, electric refrigerators and gas appliances.

Hardware and farm implement dealers.---This classification includes retail dealers selling farm implements and hardware, those selling farm implements and hay, grain, and feed, those selling farm implements only, and dealers in carriages and wagons.

Restaurant and Eating Group

Restaurants, cafeterias and lunch rooms.---Includes restaurants having full table service, cafeterias or self-serve restaurants, and lunch rooms having limited table service in addition to counter service. Automats are classified as cafeterias.

Lunch counters and refreshment stands.---This group includes box lunch companies, their product consisting of a lunch of sandwiches, fruit and dessert, sold ordinarily by street vendors or on regular delivery routes; refreshment stands, frequently found on the principal highways and adjacent to factories and office buildings; fountain-lunches, often operating in the downtown sections or in the vicinity of factories and office buildings; lunch counters with variations such as the street "diner", the hole-in-the-wall eating place, and the modern sandwich shop; and soft-drink stands.

Drinking places.---This group, added in the 1933 Census, includes retail establishments whose principal business is the sale, for consumption on the premises, of beer, ale and wine and/or liquors defined in most States as alcoholic and intoxicating beverages, and which derive no appreciable revenue from the sale of meals. Drinking places are variously known as bars, beer-gardens, taverns, cafes, and otherwise. Many places selling drinks, probably greatly exceeding in number and sales those classified as drinking places, are included in the restaurant classifications. In the absence of commodity data it is impossible to distinguish between those restaurants and lunch counters which sell such beverages with meals and those which do not, nor to determine the total sales of meals separately.

Other Retail Stores

Cigar stores and cigar stands.---This group includes cigar stores with fountain (and lunch), cigar stores without fountain, and cigar stands in pool rooms, in bowling alleys, in railway stations, and in other public places. Cigar stores often sell books and magazines and novelty merchandise, packaged candies, cosmetics, and proprietary drug preparations, while cigar stands frequently sell soft drinks.

Coal and wood yards--ice dealers.---This classification includes coal and wood yards and ice dealers. In a large number of States, many of the coal and wood yards sell substantial quantities of ice during the summer months, and ice dealers frequently sell coal, wood, and sometimes fuel oil during the winter months. Many coal and wood dealers are selling increasing quantities of fuel oil, and some are selling and installing oil-burning equipment.

Drug stores.---This group includes drug stores with fountains and those without, also known as professional drug stores. Drug stores usually sell, in addition to drugs and prescriptions, a considerable variety of toiletries, cosmetics, patent medicines, magazines, tobacco and novelty merchandise, and those with fountains frequently sell fountain lunches.

Florists.---This classification is confined to flower shops and does not include stores predominantly engaged in selling seeds, bulbs and nursery stock. The florist shop sells cut flowers and growing plants, with occasional sales of other merchandise.

Jewelry stores.---This group includes stores selling jewelry as well as an increasing volume of related merchandise. Income is also derived from repair service and sometimes from optical departments.

News dealers.---These stores and stands sell newspapers, current magazines, tobacco, souvenirs and novelty merchandise, including toys. In many instances news dealers sell books and stationery, and often operate circulating libraries.

Office and store supply and equipment dealers.---This classification includes stores selling office and school supplies, office and store mechanical appliances, office and store furniture and equipment, store fixtures, and typewriters. Many manufacturers in these fields maintain their own direct selling offices or branches and operate service departments from which a part of the reported total income is derived.

Miscellaneous classification, combined.---Under this heading are included various kinds of business not elsewhere classified. The more important classes of these stores are: book stores, gift shops with novelties, toys and cameras, luggage and leather goods stores, monument and tombstone works, (cutting stone or marble to individual specifications), musical instruments and music stores (without radios), opticians and optometrists, sporting goods stores, scientific and medical supply and equipment dealers (at retail), and stationers and custom printers.

Second-hand stores.---Under this general heading is included a variety of second-hand stores. The more important of them are dealers in tires, accessories, and auto parts; furniture stores; pawn shops (sales only); clothing and shoe dealers, building materials and hardware, farm implements, books, office appliances; and stores selling used radios, phonographs and musical instruments.

DESCRIPTION OF TERMS

Retail store

For the purposes of this census a retail store is a place of business one half (in some cases one-third) or more of whose receipts are derived from the sale of merchandise at retail, that is, sales in fairly small quantities to the consumer. The place of business may be in the form of a store or a filling station, restaurant, garage, mail-order house or district office of a crew of house-to-house salesmen; it may be the retail department of a utility company or a leased department in a store of another kind. It is characteristic of a retail store that the place of business is open to the general public. The merchandise it sells may be ready for immediate consumption, or it may need further processing.

Sales

This term Sales means total receipts of retail stores, consisting of cash or its equivalent - whether commodities or evidences of indebtedness including accounts receivable on the books of the store - accepted in exchange for merchandise, repairs or other service, space or concession lease, and the like. Refunds or allowances on returned merchandise are deducted. Receipts of retail stores are not identical with merchandise sales at retail. Usually most of such receipts represent retail merchandise sales. On the other hand manufacturing, mining, wholesale and service establishments, farmers, fishermen, hunters and trappers, itinerant vendors and others who maintain no established places of business sell some merchandise at retail. Similarly the receipts of any kind of business group must not be confused with sales at retail of a particular commodity by which the group is identified; to take an obvious instance, the sales of candy and confectionery stores are not a measure of the sales at retail of candy and confectionery.

Proprietors

The enumerators were instructed to include as proprietors all owners of unincorporated establishments and adult members of their families who were actively employed in, and devoting the major part of their time to, the business. Inactive proprietors or partners were not included. Inquiry concerning proprietors did not relate to incorporated establishments. Salaried officers of incorporated companies were considered full-time employees and not proprietors.

Full-time Employees

Employees working a full day each day the establishment is open for business, even if this represents less than a full working week or month, are reported full-time employees. This principle is followed with reference to each payroll period for which information was obtained. Therefore, persons employed on a full-time basis for only part of the year are regarded as full-time employees for that part of the year. Employees working on a full-time basis in seasonal establishments are also treated as full-time employees.

Part-time Employees

Persons employed only a few hours or days of the normal work-week or other payroll period are considered part-time employees.

Sex of Employees

A distribution by sex of the combined number of full-time and part-time employees on December 30, 1933, or nearest representative day, was required of each establishment. The ratio resulting from this inquiry was used as a basis for computing the sex distribution of the average number of employees.

Payroll

Total payroll represents the salaries, wages, commissions and bonuses paid part-time and full-time employees and salaried officers during the year. It does not include compensation of proprietors except the fixed salary of active partners if such salary is paid in addition to the partners' participation in profits. Such salaried partners, found predominantly in large businesses, are comparable to salaried executives of a corporation and are counted as employees rather than proprietors.

Reported Expenses

Reported expenses include payroll and other operating expenses such as rent, interest on current debt, traveling expenses, advertising, taxes, insurance, light, heat, power and all other overhead costs. The other expenses exclude, of course, the cost of merchandise and the interest on the investment or long time indebtedness. It is proba le that in many of the smaller retail organizations the expenses were reported on a cash rather than accrued basis. Central-office expense of chains not prorated to retail units are not included in reported expenses in any tables except the Chain Store Summary in Section 6.

CHAPTER III - CLASSIFICATIONS COMPARED

1933 and 1929

The 1929 Retail Census in its major tables used 167 kind-of-business groups, which were consolidated in the 1933 Census into 52 groups.

The 52 groups were further consolidated in some tables in 1933 into 11 groups.

Types of operation were shown in the 1929 Census in 23 classification, which were consolidated in the 1933 Census into 7 groups.

Following is a comparison of the classifications in 1933 and corresponding classification in 1929. Numerals following the groups and two kind-of-business classifications (filling stations and drug stores) indicate the 11 consolidated groups used in certain 1933 tables:

KINDS OF BUSINESS

1933 Classification	Corresponding Classification in 1929
FOOD GROUP (1)	
Candy and confectionery stores	Candy and confectionery stores:
	Candy stores-nut stores
	Confectionery stores (candy and fountain)
Dairy products-milk dealers	Dairy products stores:
	Dairy products stores (including ice cream)
	Egg and poultry dealers
	Milk dealers
Delicatessen stores	Delicatessen stores
Fruit stores - vegetable markets	Fruit stores and vegetable markets
Grocery stores (without meat)	Grocery stores (without meats)
Combination stores (grocery and meat)	Combination stores (groceries and meats):
	Grocery stores with meats
	Meat markets with groceries
Meat-seafood markets	Meat markets (including sea foods):
	Fish markets-sea foods
	Meat markets
Bakeries-caterers	Bakeries-caterers:
	Bakeries-bakery goods stores (except manufacturing bakeries)
	Caterers
Beer-liquor stores	(None)
Other food stores	Other food stores:
	Coffee, tea, spice dealers
	Farm products stores
	General food stores (miscellaneous)
	Bottled waters and beverage dealers

KINDS OF BUSINESS (Continued)

1933 Classification	Corresponding Classification in 1929
FARMERS-COUNTRY STORES -	
Country general stores	General stores--groceries with apparel
	General stores--grcceries with dry goods
	General stores--groceries with general merchandise
Farmers' supply stores	Farmers' supplies:
	Feed stores (flour, feed, grain, fertilizer)
	Fertilizer dealers
	Harness shops
	Irrigation and drainage equipment and supplies (retail)
	Farmers' supply stores
	Seed stores, bulbs, and nursery stock
	Cooperages (barrels, boxes, crates, casks)
	Coal and feed stores
	Grain elevators (sales at retail)
	Feed stores with groceries
GENERAL MERCHANDISE GROUP - (4)	
Department stores	Department stores:
	With food departments
	Without food departments
	Mail-order houses-general merchandise
Dry goods stores (includes paper patterns)	Dry goods stores:
	Dry goods stores
	Piece goods stores
General merchandise stores (includes institutional stores-also auction houses selling general merchandise)	General merchandise stores:
	With food departments
	Without food departments
	Army and Navy goods stores
	Women's exchanges and handiwork shops
Variety stores	Variety, 5-and-10, and to-a-dollar stores
APPAREL GROUP - (5)	
Men's stores	Men's and boys' clothing and furnishings stores:
	Men's and boys' clothing stores
	Men's and boys' hat stores
	Men's furnishings stores
	Men's clothing and furnishings stores
Family clothing stores	Family clothing stores (men's, women's, and children's)
Women's specialty shops	Women's ready-to-wear specialty stores (apparel and accessories)
Furriers--fur shops	Furriers--fur shops
Millinery stores	Millinery stores (including leased millinery departments)
Custom tailors	Custom tailors

KINDS OF BUSINESS (Continued)

1933 classification	Corresponding classification in 1929
APPAREL GROUP - (5) - continued:	
Other accessory stores	Women's accessories stores:
	Blouse shops
	Corset and lingerie shops
	Hosiery shops
	Knit goods shops
	Costume accessories stores (including jewelry, bags, and gloves)
	Umbrella shops (including parasols, canes)
	Other apparel stores:
	Children's specialty shops
	Dressmakers
	Infants' wear shops
	Mail-order apparel houses
Shoe stores	Shoe stores:
	Shoe stores-men's
	Shoe stores-women's
	Family shoe stores - (men's, women's and and children's)
AUTOMOTIVE GROUP - (6)	
Motor-vehicle dealers (new and used)	Motor-vehicle dealers(new and used):
	Automobile salesrooms
	Used-car dealers
	Automobile dealers with farm implements and machinery
Accessories, tire, battery dealers	Accessories, tires and batteries:
	Accessory stores with tires and batteries
	Battery and ignition shops and brake repair shops
	Tire shops (including tire repairs)
Filling stations - (7) (includes fuel-oil retailers)	Filling stations:
	Filling stations-gasoline and oil
	Filling stations with tires and accessories
	Filling stations with other merchandise
Motorcycle-bicycle dealers	Motor cycles, bicycles, and supplies:
	Motor-cycle dealers
	Bicycle, motor cycle, and supply stores
	Bicycle shops (including repairs)
Garages	Garages and repair shops:
	Body, fender, and paint shops
	Garages (repairs and storage, gasoline, oil, accessories)
	Parking stations, parking garages, and lots
	Radiator shops (including repairs)
Other automotive	Other automotive establishments:
	Aircraft and accessories
	Boats (motor boats, yachts, canoes)

KINDS OF BUSINESS (Continued)

1933 classification	Corresponding classification in 1929
FURNITURE-HOUSEHOLD GROUP - (8)	
Furniture stores	Furniture stores:
	Furniture stores
	Furniture and undertaker
	Furniture and hardware stores
Floor coverings, drapery and upholstery stores	Floor coverings, drapery, curtain, and upholstery stores:
	Drapery, curtain, and upholstery stores
	Floor coverings stores
Household appliance stores	Household appliance stores:
	Household appliance stores (electric only)
	Household appliance stores (incl. gas)
	Refrigerator dealers (electric only)
	Refrigerator dealers (electric & gas)
	Stove and range dealers
Other homewares stores	Other home furnishings and appliance stores:
	Aluminumware
	Antique and used furniture dealers
	Brushes and brooms (largely house-to-house)
	China, glassware, crockery, tinware, enamelware dealers
	Picture and framing stores
	Antique shops
	Awning, flag, banner, window shade, and tent shops
	Interior decorators
	Lamp and shade shops
Radio stores	Radio and music stores:
	Radio and electrical shops
	Radio and musical instrument stores
LUMBER-BUILDING-HARDWARE GROUP - 9	
Lumber-building material dealers	Lumber and building materials:
	Lumber and building material dealers
	Lumber and hardware dealers
	Roofing dealers
	Other retailers of building materials (brick, stone, cement, etc.)
Electrical shops (without radio)	Electrical shops (without radio)
Heating-plumbing shops	Heating and plumbing shops:
	Heating appliance and oil burner dealers
	Plumbing shops (heating and ventilating)
Paint-glass stores	(Paint and glass stores:
	Glass and mirror shops
	Paint and glass stores
Hardware stores	Hardware stores

KINDS OF BUSINESS (Continued)

1933 Classification	Corresponding classification in 1929
Hardware and farm implement dealers	Hardware and farm implement stores:
	Farm implement, machinery and equipment dealers
LUMBER-BUILDING-HARDWARE GROUP - (Continued)	Farm impleent dealers with hay, grain and feed
	Hardware and farm implement stores
RESTAURANT GROUP - (2)	
Restaurants-lunch rooms	Restaurants, cafeterias, and lunch rooms:
	Cafeterias
	Lunch rooms
	Restaurants with table service
Lunch counters-refreshment stands	Lunch counters, refreshments stands, etc.:
	Box lunch
	Refreshment stands
	Fountain-lunches
	Lunch counters
	Soft-drink stands
Drinking places (None)	
OTHER RETAIL STORES - (11)	
Cigar stores - cigar stands	Cigar stores and cigar stands:
	Cigar stores with fountains
	Cigar stands
	Cigar stores without fountains
Coal wood-ice dealers	Coal and wood yards-ice dealers:
	Coal and wood yards
	Ice dealers
Drug stores - (10) (incl. leased drug departments and patent medicine retailers)	Drug stores:
	Drug stores without fountains
	Drug stores with fountains
Florists	Florists
Jewelry stores	Jewelry stores:
	Jewelry stores (installment-credit)
	Jewelry stores
News dealers	News dealers
Office equipment dealers	Office, school, and store supply and equipment dealers:
	Office and school supply dealers
	Office and store mechanical appliance dealers (retail)
	Office and store furniture and equipment dealers
	Store fixture dealers
	Typewriter dealers

KINDS OF BUSINESS (Continued)

1933 Classification	Corresponding classification in 1929
Other classifications	Book stores:
	Book stores, incl. religious book dealers.
	Circulating libraries (book sales only)
	Gifts-novelties and toys-cameras:
	Toy shops
	Art and gift shops
	Novelty and souvenir shops
	Camera dealers-photographic supplies
	Luggage and leather goods stores
	Music stores (without radio)
	Opticians and optometrists
	Sporting goods stores (including athletic and playground equipment):
	Sporting goods specialty stores
	Sporting goods stores with toys and stationery
	Athletic and playground equipment dealers
	Scientific and medical instrument and supply dealers (retail)
	Stationers and printers:
	Dealers in accounting and legal forms and blank books
	Paper and paper products stores
	Printers and lithographers
	Stationers and engravers
	Monument and tombstone works
	Miscellaneous classifications (combined)
SECOND-HAND STORES - (11)	Tires, accessories and parts (secondhand)
	Furniture stores (secondhand)
	Pawn shops (sales)
	Clothing and shoe stores (secondhand)
	Book stores (second hand)
	Building material and hardware dealers (second-
	Office appliance dealers (second hand)
	Radios, phonographs, musical instruments (secondhand dealers)
	Other secondhand dealers)

TYPES OF OPERATION

1933 Classification	Corresponding classification in 1929
Independents	Single-store independents
	Two-store independents
	Three-store independents
	Local branch systems (Parent stores and three or more smaller branches merchandised from parent stores)
Chains 1/	Local chains
	Sectional Chains
	National chains
	Manufacturer-controlled chains
Direct selling (house-to-ohouse)	Direct selling (house-to-house)
Mail-order houses (catalog only)	Mail-order houses (catalog only)
Commissaries or company stores	Industrial stores (including commissaries)
Utility-operated stores	Utility-operated retail stores
All other types	Road-side markets or stands
	Curbside markets or stands
(Leased departments, cooperatives, etc.)	Itinerant vendors
	Rolling stores
	Leased departments - independent
	Leased department chains
	Cooperative stores
	Cooperative buying associations
	Retailers-country buyers
	Retailers - wholesalers
	Unclassified types

1/ Other types of operation also include chains, notably mail-order houses, utility-operated stores and leased-department operations, in which case the latter types determine the classification. For summary of all chains see Chapter I, Section 6.

CHAPTER IV - DESCRIPTION OF THE TABLES

Table A---Comparison of the data for 1933 and 1929, by kinds of business and by States, concerning the number of stores, amount and proportion of sales, the number of full-time employees, the total payroll, average annual earnings of full-time employees and stocks on hand at end of year. Separate comparative tables A for each State are contained in this Volume.

Table 1---Basic statistical data for 1933, concerning the number of stores, amount and proportion of sales, number of proprietors, number of full-time and part-time employees, amount of full-time and part-time payroll, average earnings per full-time employee and total reported expenses. Table 1A presents the information by kinds of business.

Similar tables for each State and for the 13 largest cities are contained in Volume II. Table 1B presents the same information by States. Table 1C presents, by kinds of business for the United States and separately for the five States of California, Georgia, Indiana, Kansas and New York, the basic data on which operating expense ratios have been computed for 1933.

Table 2---Full-time and part-time employment by months, average number for the year, number of proprietors, and the distribution of employees, full-time and part-time combined, by sex. Table 2A presents the information by kinds of business.

Similar tables for each State and for the 13 largest cities are contained in Volume II. Table 2B presents the same information by States.

Table 3---Analysis of basic data by types of operation, (independents, chains, mail-order, direct-selling and other types) showing the number of stores, amount and proportion of sales, number of of full-time employees, number of proprietors, amount of payroll, average annual earnings of full-time employees and total reported expenses for 18 kinds of business and for all retail business in the United States. Similar tables for each State are contained in Volume VI.

Table 4---Analysis of basic information by 10 size-of-business groups, beginning with stores whose sales in 1933 were under $10,000. Table 4A shows the number of stores and the amount of their sales by kinds of business, while Table 4B presents the same data by States and geographic divisions.

Table 4C shows the number of full-time employees and proprietors by kinds of business, while Table 4D presents the same data by States and geographic divisions.

The stores whose sales volume exceeds one million dollars are further analyzed by size in Table 4E in which information is given separately by kinds of business. Tables similar to 4A for each State are to be found in Volume VII.

Table 5---Credit business shows the number of stores, total sales, and credit sales of stores reporting sales on credit as distinct from stores which reported no sales on credit. The latter are assumed to include few stores other than those which sell entirely for cash. Table 5A presents this information by kinds of business and Table 5B by States and geographic divisions. Similar tables for each State are contained in Volume V.

Table 6--Stores and sales canvassed in the 1933 Census analyzed in the following breakdown; stores established in 1929 or prior years, stores opened in 1930, 1931 or 1932, and stores opened in each of the quarters of 1933. Table 6A presents the information by kinds of business and Table 6B by States. Table 6C presents information on full-time employment, proprietors, payroll and reported expense by States, in a similar breakdown by date of establishment. Tables similar to 6A for each State are contained in Volume IV.

Table 7---Analysis of sales to show separately the receipts from sales of merchandise, sale of meals, repairs and service and other sources. Also includes columns showing the amount of sales by retailers to other retailers, and stocks on hand at the end of the year, at cost or replacement values. Table 7A presents this information by kinds of business and Table 7B by States.

Table 8---Retail sales by wholesalers. Contains a summary of sales to ultimate consumers by wholesalers divided into (1) Sales by wholesalers proper, (2) Sales by other types of wholesale establishments. Table 8A presents this information by kinds of business (wholesale classifications) and Table 8B by States. Tables similar to 8A for each State may be found in more detail in the Wholesale Census reports.

Table 9---Summary of receipts of service establishments, places of amusement and hotels as presented in detail in the Service Census reports. It shows an analysis of the receipts from merchandise sales, from service sales, from room rentals, from the sale of meals, from admissions, and from other sources. Table 9A shows the information by kinds of business (Service Census classifications) and Table 9B by States. Tables similar to 9A for each State may be found in the Service Census reports.

Table 10---Retail distribution by areas. Shows by States the number of stores and their sales classified by 11 business groups. Table 10A presents the information for 1933 and Table 10B shows comparable information for 1929.

Tables similar to Table 10A for each State, contained in Volume VIII, show the same information for each county, city and other incorporated place of 2,500 or greater population, and the remainder of each county.

Table 11---Shows by States the number of stores, their sales, number of proprietors, number of full-time employees, the total payroll and the part-time proportion of payroll.

Similar tables for each State, contained in Volume III, give the same information for every county, city and other incorporated place of 2,500 or greater population, and the remainder of each county.

Table 12---Cities of more than 50,000 population. Shows the number of stores, their sales, the number of proprietors, number of full-time employees, the total payroll and the part-time proportion of the payroll for each city of more than 50,000 population, alphabetically arranged for the United States.

Similar tables for each city of more than 50,000 population, contained in Volume III, present a breakdown of the same information by 52 kinds of business.

RETAIL DISTRIBUTION: 1933

Table A.- UNITED STATES SUMMARY—COMPARISON OF 39 PRINCIPAL KINDS OF BUSINESS, 1933 and 1929

Stores, Sales, Employees, Pay Roll, and Stocks
(Tables for each State are given beginning on Page A-35)
(Sales, pay roll, and stocks expressed in thousands of dollars)

All other kinds of business	612,247	7,372,900	--	--	768,309	656,881	900,276	93,735	1,050	2,007,634

1/ Includes no compensation for the services of proprietors working in their stores, in lieu of employees.

2/ Includes leased departments, market and roadside stands, itinerant vendors and rolling stores, cooperatives, a few retailer-wholesalers (whose business is evenly divided between the two) and country buyers who also operate retail stores. The latter were difficult to identify from the 1933 schedule, and the comparison between 1933 and 1929 percentages is subject to qualification in that the entire 1929 percentage for retailer-country buyers is included for comparison purposes in the percentage shown for independents. Further details are not available from the condensed tabulations used in 1933.

3/ Totals differ slightly from other tables because of an error in California in classifying certain apparel stores as department stores. The correction is reflected in this Summary, as well as in the California Type Report.
One large national chain with total sales in 1933 (published in the press) of more than $78,000,000 so changed the character of its business since 1929 that it now is classified as a department-store chain whereas it was a variety-store chain before. If for comparison purposes it were eliminated from the 1933 figures, the proportion of chain sales would be 21.4 percent against 16.7 percent in 1929--conversely, the variety-store proportion of chain sales would be 92.1 percent in 1933 against 89.2 percent in 1929.

4/ A discrepancy of $370,000 exists between the national totals shown here and the State reports, caused by an error in classification of certain stores in Montana and Wyoming. The correction is reflected in the State tables, but is not considered of sufficient importance to justify changing the national totals.

5/ The totals differ slightly from other tables because of an error in Illinois in classifying certain electrical appliance stores as radio stores. The correction is reflected in this summary, as well as in the Illinois Type Report.

6/ Restaurants and eating places in the 1933 tabulation include also lunch counters and refreshment stands in addition to restaurants, cafeterias and lunch rooms. The 1929 percentages reflect only the latter three kinds of restaurants and, therefore, are not strictly comparable, but the new basis is considered preferable for future comparisons, in order to distinguish eating places as such from drinking places.

7/ This classification was not included in the 1929 Type summary (table 6) and, therefore, no percentage figures for comparison with 1929 are available.

8/ Hardware stores in this table include two business classifications, i.e., hardware stores, and hardware and farm implement dealers. Since the 1929 Type summary (table 6) included only the former, 1929 percentages are not available for comparison.

TABLE 4A.--UNITED STATES SUMMARY--NUMBER OF STORES AND SALES, BY SIZE OF STORE, BY KINDS OF BUSINESS.

(Sales are expressed in thousands of dollars)

Kind of Business	Total		Stores with Annual Sales of—																			
			$1,000,000 or more		$500,000 to $999,999		$300,000 to $499,999		$200,000 to $299,999		$100,000 to $199,999		$50,000 to $99,999		$30,000 to $49,999		$20,000 to $29,999		$10,000 to $19,999		Less than $10,000

1/ - Total column includes data for certain wholesalers not distributed to size-columns.

2/ - Figures differ from those shown in certain other tables to the extent of 11 stores, 992 full-time employees, and sales of $3,131,000 because of an error in Illinois in classifying these 11 electrical-appliance stores as radio stores.

TABLE 43.--UNITED STATES SUMMARY--NUMBER OF STORES AND SALES, BY SIZE OF STORE, BY GEOGRAPHIC DIVISIONS AND STATES

(Sales are expressed in thousands of dollars)

DIVISION AND STATE	Total		Stores with Annual Sales of—																			
			$1,000,000 or more		$500,000 to $999,999		$300,000 to $499,999		$200,000 to $299,999		$100,000 to $199,999		$50,000 to $99,999		$30,000 to $49,999		$20,000 to $29,999		$10,000 to $19,999		Less than $10,000

1/ - Total column includes data for certain wholesalers not distributed to size-columns.

2/ - Figures differ from those shown in certain other tables to the extent of 11 stores, 992 full-time employees, and sales of $3,131,000 because of an error in Illinois in classifying these 11 electrical-appliance stores as radio stores.

TABLE 4B.—UNITED STATES SUMMARY—NUMBER OF STORES AND SALES, BY SIZE OF STORE, BY GEOGRAPHIC DIVISIONS AND STATES

(Sales are expressed in thousands of dollars)

DIVISION AND STATE	Total		Stores with Annual Sales of—																			
			$1,000,000 or more		$500,000 to $999,999		$300,000 to $499,999		$200,000 to $299,999		$100,000 to $199,999		$50,000 to $99,999		$30,000 to $49,999		$20,000 to $29,999		$10,000 to $19,999		Less than $10,000

1/ Total column includes data for certain wholesalers not distributed to size-columns.

2/ Figures differ from those shown in certain other tables to the extent of 11 stores, 992 full-time employees, and sales of $3,151,000 because of an error in Illinois in classifying these 11 electrical-appliance stores as radio stores.

TABLE 4D. - UNITED STATES SUMMARY - NUMBER OF FULL-TIME EMPLOYEES AND PROPRIETORS, BY SIZE OF STORE, BY GEOGRAPHIC DIVISIONS AND STATES

DIVISION AND STATE	TOTAL		STORES WITH ANNUAL SALES OF—																			
			$1,000,000 or more		$500,000 to $999,999		$300,000 to $499,999		$200,000 to $299,999		$100,000 to $199,999		$50,000 to $99,999		$30,000 to $49,999		$20,000 to $29,999		$10,000 to $19,999		Less than $10,000

1/ This classification for 1929 includes 24 body, fender and paint shops and 4 parking stations, parking garages and lots, which are not included in the 1933 total. Figures for these establishments are included in this census in the service division, a new feature of the Census of American Business. The body, fender and paint shops reported receipts of $273,000 in 1929, gave employment to 61 full-time and 3 part-time employees and paid $94,000 in salaries and wages; the parking services reported receipts of $80,000 and paid $10,000 in salaries and wages to 11 full-time and 2 part-time employees.

2/ Differs slightly from previous report because of inclusion of figures omitted in 1929 to avoid disclosures.

RETAIL DISTRIBUTION: 1933

1/ Differs slightly from previous report because of inclusion of figures withheld in 1929 to avoid disclosure. Two classifications combined.

2/ This classification for 1929 includes 20 body, fender and paint shops, and 3 parking stations, parking garages and lots, which are not included in the 1933 total. Figures for those establishments are included in this census in the service division, a new feature of the Census of American Business. The body, fender and paint shops reported receipts of $417,000 in 1929, gave employment to 72 full-time and 2 part-time employees and paid $126,000 in salaries and wages; the parking services reported receipts of $37,000 and paid $12,000 in salaries and wages to 8 full-time and 1 part-time employees.

3/ In the lumber, building and hardware group, some businesses that were classed as retail in 1929 have changed the character of their business and now are wholesalers, while others that were primarily wholesale but now sell more at retail than at wholesale are classed in 1933 as retailers. Classification is particularly difficult in their group and necessarily must vary as the character of a business changes.

4/ Of the $6,736,000 of sales in 1929, $3,000,000 represents sales of companies classified in 1933 as wholesalers. Decrease after correction, 45%.

1/ This classification for 1933 includes 31 body, fender and paint shops and 9 parking stations, parking garages and lots, which are not included in the 1933 total. Figures for those establishments are included in this census in the service division, a new feature of the Census of American Business. The body, fender and paint shops reported receipts of $407,000 in 1933, gave employment to 90 full-time and 9 part-time employees and paid $156,000 in salaries and wages; the parking services reported receipts of $145,000 and paid $19,000 in salaries and wages to 15 full-time employees.

2/ Differs slightly from previous report because of inclusion of figures withheld in 1929 to avoid disclosure.

(1)-A substantial proportion (about 20%) of milk dealer sales reports for 1929 were received too late to be included in State reports but their total was added in a lump sum, as described on the third text page of the United States Summary: 1929 (See P.15, Vol. 1, Part 1).

2/-This classification for 1929 includes 50 body, fender and paint shops, and 5 parking stations, parking garages and lots, which are not included in the 1933 total. Figures for those establishments are included in this census in the service division, a new feature of the Census of Business. The body, fender and paint shops reported receipts of $690,000 in 1929, gave employment to 128 full time and 23 part time employees and paid $189,000 in salaries and wages; the parking services reported receipts of $18,000 and paid $3,000 in salaries and wages to 4 full time employees.

RETAIL DISTRIBUTION: 1933

1/ This classification for 1929 includes 32 body, fender and paint shops and 4 parking stations, parking garages and lots, which are not included in the 1933 total. Figures for these establishments are included in this census in the service division, a new feature of the Census of American Business. The body, fender and paint shops reported receipts of $477,000 in 1929, gave employment to 119 full-time and 13 part-time employees and paid $191,000 in salaries and wages; the parking services reported receipts of $79,000 and paid $20,000 in salaries and wages to 18 full-time employees.

RETAIL DISTRIBUTION: 1933

Table A.—STATE OF WISCONSIN -- COMPARISON OF 39 PRINCIPAL KINDS OF BUSINESS, 1933 and 1929

Stores, Sales, Employees, Pay Roll, and Stocks

(Sales, pay roll, and stocks expressed in thousands of dollars)

Kind of Business	Number of Stores		Sales					Full-time Employees (average number)		Total Pay Roll (full-time and part-time)		Average Annual Earnings per Full-time Employee		Stocks on Hand, End of Year (at cost)	
			Amount		Percent of total sales		Percent of change

1/ - This classification for 1929 includes 73 body, fender and paint shops, and 23 parking stations, parking garages and lots, which are not included in the 1933 total. Figures for those establishments are included in this census in the service division, a new feature of the Census of American Business. The body, fender and paint shops reported receipts of $972,000 in 1929, gave employment to 216 full-time and 23 part-time employees and paid $361,000 in salaries and wages; the parking services reported of $471,000 and paid $55,000 in salaries and wages to 45 full-time and 6 part-time employees.

Table A.—STATE OF WYOMING -- COMPARISON OF 39 PRINCIPAL KINDS OF BUSINESS, 1933 and 1929

Stores, Sales, Employees, Pay Roll, and Stocks

(Sales, pay roll, and stocks expressed in thousands of dollars)

BUREAU OF THE CENSUS

William L. Austin, Director

—o—

This is the second of the final series of reports on retail trade presenting the results of the 1933 Census of American Business. The statistics were collected in 1934 by a field canvass of retail stores in every State, city and county in the United States, with funds provided by the Federal Civil Works Administration. They cover the operations of retailers during the year 1933.

The reports are prepared under the supervision of Fred A. Gosnell, Chief Statistician for the Census of American Business, by John Guernsey, in charge of Retail Distribution. Assistance in the preparation of statisticial data was rendered by William A. Ruff, Assistant Chief Statistician, and James O. Reid, Retail Assistant.

RETAIL CENSUS REPORTS - FINAL SERIES: 1933

ARRANGEMENT AND CONTENTS OF VOLUMES

Volume I - U. S. Summary. Contains a general description of the Retail Census for 1933, definitions of terms and classifications, and U. S. Summaries, by kinds of business and by States, of Tables 1 to 6 and 10 to 12 contained in volumes listed below. It also includes tables providing an analysis of retail sales (Table 7), a summary of wholesalers' sales at retail (Table 8) and an analysis of receipts of service establishments (Table 9).

A separate section presents an analysis by size of city, of stores and sales classified into 11 kind-of-business groups. This analysis is carried through for each State and geographic division and summarized for the United States as a whole.

Comparisons with 1929 of the principal data by kinds of business are contained in a special table (Table A), which is presented separately for each State and in summary for the United States.

A chain-store section contains a summary of all known retail chains, classified by kinds of business, showing units, sales, stocks, employees and payroll in stores and in central offices, reported expenses in stores and in central-offices and the proportion prorated to stores.

Volume 2 - General Statistics, by States and 13 largest cities, by kinds of business (Table 1). Employment, by States and 13 largest cities, by kinds of business (Table 2).

Volume 3 - County Totals. Contains summary of stores, sales, proprietors, full-time employees and payroll for each city, town and county throughout the United States (Table 11), and summary by 52 kinds of business for each city of more than 50,000 population (Table 12).

Volume 4 - Analysis of Stores by Date of Establishment, showing for each State and for each kind of business the number and sales of stores established in 1933 (by quarters), those establishments between 1929 and 1933, and those in operation in 1933 which were also in operation in 1929 (Table 6).

Volume 5 - Credit Business. Contains analysis for each State of stores and sales by kinds of business, classified to show credit-granting stores separate from all-cash stores (Table 5).

Volume 6 - Chains and Independents and other types of operation- State totals, and more detailed analyses for 18 kinds of business in which chains are a more or less important factor (Table 3).

Volume 7 - Stores and sales by size of business. Shows stores and sales by kinds of business, classified in 10 size groups, by States (Table 4).

Volume 8 - Retail Distribution, 1933, by Areas. Stores and sales by 11 business groups, for States, counties and cities (Table 10).

Special Reports by Trades. Food Retailing, Variety-Store Chains, Department-Store Chains, Drug Retailing (including drug-store chains), Retail Employment and Wages, Automotive Retailing, Apparel Retailing and others. (Separate reports have been issued covering the above-named subjects; they are not brought together in a single volume.)

CENSUS OF AMERICAN BUSINESS: 1933

VOL. 2 - GENERAL STATISTICS OF RETAIL DISTRIBUTION IN 1933 (TABLE 1) AND RETAIL EMPLOYMENT, BY MONTHS (TABLE 2)

This is the second of the final series of reports on retail trade for 1933. This report summarizes in a more permanent form what had already been published in the series of State and City reports. It also presents some additional information, particularly on stocks, operating expenses and the distribution of employees. Terms and classifications in this report are defined in Volume I of this series.

Throughout the report comparisons are made with the data for 1929, collected and tabulated as part of the Census of Distribution for 1929. The significance of these comparisons cannot be overestimated; they reveal the nature and extent of changes which occurred in the retail field during the four years of unsettled business conditions. It is proper, however, to bear in mind that the conclusions based on these comparisons are subject to some qualification.

Although every effort had been made to insure comparability between the 1933 and 1929 censuses, the data are not strictly comparable on some points. The absence of perfect comparability is largely traceable to two factors. First, information in 1933 was collected on a shorter form than in 1929; the most notable omission in the 1933 schedule was the inquiry on distribution of sales by commodities; the absence of information on this point renders the kind-of-business classifications for 1933 somewhat less precise than the similar groupings for 1929. Second, the retail canvass for 1933 was carried through as part of a larger Census of American Business, which covered among other types of business also service establishments; for this reason the line of demarcation between retail and service establishments was drawn more definitely in the 1933 Census than was possible in the 1929 Census when service establishments were not canvassed.

Stores and Sales Compared

The total sales of retail stores in 1933 aggregated $25,037,225,000 which is 49 percent less than the $49,114,653,000 total of 1929. The number of stores in 1933 was 1,526,119, which is 1.1 percent less than the 1,543,158 stores in 1929. How much of the decrease in the dollar volume of sales is due to the decline in retail prices and how much to the reduction in the physical quantity of goods sold cannot be readily ascertained. The use of currently compiled retail price indices in this connection is a practice of dubious validity because the Census classification of establishments by kinds of business is based on the principal kinds of goods handled; the sale of other goods not reflected in the price index may account for a considerable proportion of total sales in certain kind-of-business groups. Moreover, the weighting used in the available price indices cannot be tested in reference to 1933 Census figures on sales in the absence of information on the distribution of sales by commodities.

The food group, due to the relatively small decline in dollar sales, advanced in relative importance to other kinds of business, accounting for 27.1 of total retail sales in 1933 against only 22.1 percent in 1929. Likewise, restaurants accounted for 5.7 percent of total sales against only 4.3 percent in 1929. In both groups the sale of beer, wine and liquor was added in 1933, but it is not likely that this addition is responsible for a large increase in sales of food stores and restaurants. The sales of beer-and-liquor stores and of drinking places account for less than 1.5 percent of total sales in the food and restaurant groups, although it should be noted that beer, wine and liquor are also sold in places other than those mentioned above.

The general merchandise group (department stores, dry goods and variety stores) also advanced in relative importance from 13.1 percent of total sales in 1929 to 15.5 percent in 1933. Among other advances were filling stations, from 3.6 percent to 6.1 percent, and drug stores from 3.4 percent to 4.3 percent.

A comparative summary for 1933 and 1929 of the percentage distribution of retail sales by kind-of-business groups follows:

Ratio of Sales to Total Sales, 1933 and 1929

	1933	1929
All Stores	100.00	100.00
Food group	27.13	22.07
Restaurants and eating places	5.71	4.33
Farmers' supplies and country gen'l	6.24	7.52
General merchandise group	15.54	13.12
Apparel group	7.68	8.63
Automotive group	17.65	19.58
Furniture and household group	3.83	5.61
Lumber, building, and hardware group	5.36	7.83
Cigar stores	.76	.83
Coal and wood yards	2.49	2.06
Drug Stores	4.26	3.44
Jewelry stores	.70	1.09
News dealers	.23	.31
Other retail stores	2.00	3.28
Second-hand stores	.42	.30

Employment compared

Retail stores in 1933 engaged the services of 5,007,993 persons, of which 2,703,325 were full-time employees and 730,327 were part-time employees.

In addition to employees there were 1,574,341 proprietors actively engaged in the operation of their stores.

The decline from 1929 to 1933 in the total number of persons engaged in retail trade was 905,554, or about 15 percent of total retail employment in 1929. The number of full-time employees declined 1,130,000 (29.5 percent) in the four years since 1929 and the number of part-timers increased 161,000 (28.3 percent). The number of proprietors also increased nearly 64,000 (4.2 percent), despite a decline of over 17,000 in the number of stores.

The magnitude of the changes in employment since 1929 is so appreciable that, for United States totals at least, the result is not significantly affected by the differences in the method of computing averages for the year. These, however, must be noted at this point. The 1929 schedule called for information on the number of employees in April, July, October and December, 1929, and at the time the canvass was made, whereas on the 1933 schedule information was requested for the payroll period ending nearest the fifteenth of each month, as well as for December 30 by sex.

The 1929 average was calculated separately for each schedule on the basis of information described above, whereas the 1933 average is the arithmetic mean of the twelve monthly figures. For purposes of comparison with 1933, the 1929 average for part-time employees was recalculated as an arithmetic mean of the four quarterly figures. This accounts for the reduction in the 1929 number of part-time employees from 676,559, a figure published in the 1929 volumes pertaining to the Census of Distribution, to 569,359, the figure used in the reports of the Census of American Business.

A part-time employee is defined by the Census as a person employed only a few hours or days of the normal work-week or other payroll period. The Census figures on part-time employees do not indicate what proportion of full-time was worked by them, but an approximation to this proportion can be established by comparing the average annual earnings of part-time employees with the average annual earnings of full-time employees. The average annual earnings of part-time employees are shown to be 34.2 percent of the average annual earnings of full-time employees, indicating that the average part-time employee works about one-third of the normal number of working hours or days of a full-time employee. On the same basis the average part-time employee in 1929 worked 21.6 percent of the number of hours or days of the full-time employee in that year. This increase in time worked, and the growth in numbers mentioned above, indicate the increased importance of part-time employment in the retail field.

Table 1A herein shows the number of full-time and part-time employees by kinds of business; Table 1B shows the same information by States and Table A shows a comparison by kinds of business and by States between 1933 and 1929.

Employment by Months

Employment is the only item in the 1933 Retail Census on which information was requested by months. The number of employees, therefore, is the only available Census measure of the change in conditions which occurred in the course of 1933. The summary below for retail trade as a whole shows that employment increased continually, but not evenly, each month beginning with April. A part of this increase undoubtedly reflects the operation of seasonal factors; the remainder may be credited to improvement in retail trade, and to government measures intended to increase employment, such as the President's Reemployment Agreement.

Table 2A, which shows for each month the number of full-time and of part-time employees by kinds of business; Table 2B, which shows for each month the number of full-time and of part-time employees by States; and State and City Tables 2, which show for each month the number of full-time and of part-time employees by kinds of business, afford a measure of the differences in the operation of seasonal and cyclical factors as between different kinds of business and different areas.

8971

Month	Average Number of Employees			Increase over Preceding Month	
	Total	Full-Time	Part-Time	Total Number	Percent
Average, 1933	3,433,652	2,703,325	730,327

Employees by Sex

Tables 2A and 2B give also the average number of employees by sex and the proportion of women employees in each kind of business and in each State. Of the 3,433,652 employees in 1933, 2,360,474 (68.7 percent) were men and 1,073,178 (31.3 percent) were women. These proportions compare with 68 percent of men and 32 percent of women in 1929. The absolute figures in both years are estimates based on the reported proportions by sex on a particular date--December 30, 1933, and the date of the canvass for 1929. Neither figure includes central-office employees of chain store organizations, which are shown in a summary in Vol. I and in the several chain merchandising reports.

No analysis of proprietors by sex is available. The 1929 Census covering approximately the same number of proprietors showed that 91 percent were men and 9 percent were women. If in the absence of better data the same proportions are applied to the 1,574,341 proprietors in 1933, there is indicated a total of 1,432,650 men and 141,691 women.

The amount of payroll shown in this report is the amount paid to store employees in the form of salaries, wages, bonuses and commissions. It includes the compensation of corporate officers in incorporated establishments. In the case of a few large businesses operated by partnerships, the fixed compensation of managing partners paid over and above their participation in profits, is regarded as a salary comparable to salaries of corporate officers and is included in the payroll figures. The payroll excludes, however, the compensation of proprietors working in their own stores in lieu of employees, whose withdrawals of earnings are within the control of the proprietor. Central-office payroll of the chains is not included in store payrolls.

The payroll is reported in total and separately for part-time employees, thereby providing the basis for computing full-time payroll. Of the total of $2,910,445,000 paid to employees in 1933, $2,664,447,000 was paid to full-time employees and $245,998,000 was paid to part-time employees. Payroll cost in 1933 averaged $11.62 per $100 of sales compared with $10.57 per $100 of sales in 1929.

Average Earnings of Full-Time Employees

The average annual earnings of full-time employees in 1933 were $986 compared with $1,312 in 1929, a decline of about 25 percent. This is perhaps the most accurate measure available of the decline in the rate of pay of retail employees. The decline was not uniform throughout the country. It averaged 19 percent in New England, 22 and 23 percent along the Atlantic Coast, 24 percent along the Pacific Coast, and as much as 28 percent in the West South-Central division, particularly Arkansas and Oklahoma. Table A by States presents these comparisons by Geographic Divisions and for individual States.

The average of annual earnings is obtained by dividing full-time payroll by the average number of full-time employees. Because the average number of employees for the year is obtained by averaging the numbers reported for pay periods ending nearest the 15th of each month, the two factors are directly comparable except for fluctuation in the number of employees within the month in those cases when the pay period is shorter than a month.

Since no breakdown of employees or payroll is available by grades or salary rates, average annual earnings may be somewhat misleading in some comparisons. In proprietorships, which constitute a very large proportion of retail stores (about 84 percent in 1929), the proprietors usually fulfill the functions performed in incorporated organizations by the one or two highest paid employees. In such proprietorships, most of which are small stores, the highest-paid employees may therefore be several classifications lower in the wage scale than the executives of incorporated stores. This factor tends to lower the average of annual earnings of full-time employees in independent stores as compared with chain units, whose payrolls include such store-operating executives as store managers, and part of the compensation of division superintendents. It also tends to bias comparisons between kinds of business in which the typical operating units differ appreciably in size.

The decline in average earnings of employees in the four-year period varied by kinds of business from as little as 15 percent in grocery stores and 18 percent in filling stations to as much as 34 percent in the case of employees of motor vehicle dealers. Variety stores constitute the only kind of business showing an increase in employees' earnings, the average having gone up from $706 in 1929 to $760 in 1933, or 8 percent.

The kinds of business which show less than the average (25 percent) drop in annual earnings of employees include the entire food group, the entire general-merchandise group (of department, dry goods and variety stores), the country general and farmers' supply stores, women's specialty stores, family clothing stores, auto-supply stores, filling stations, coal and wood yards, drug stores, jewelry stores and news dealers.

Stocks on Hand

Table A in this report shows that stocks on hand at cost or market, at the end of 1933, aggregated $3,903,969,000 compared with $7,262,583 at the end of 1929, a decline of about 46 percent, which is nearly as great as the decline in dollar sales. How much of this is accounted for by price alone cannot be determined with any accuracy, but it is known that the price of many consumer goods increased markedly in the summer and early fall of 1933 and probably is reflected in inventory values at the end of 1933. The ratio of stocks to sales in 1933 was 15.6 percent, compared to 14.8 percent in 1929.

Reported Expenses

Reported expenses, which include no allowance for proprietors' services declined greatly in dollar volume from 1929 to 1933, but the decrease was not proportionate to the decline in sales.

Such expenses in 1933 required $25.97 of each $100 of sales, compared with $21.12 in 1929. Of this total, payroll accounted for $11.62 in 1933 and $10.57 in 1929. These ratios include no provision for proprietors' services, nor do they providefor capital or management return to proprietors. The major factor in the increase, therefore, was expense other than payroll, such as rent, advertising, overhead and the like, many elements of which cannot be readily adjusted to increases and decreases in sales volume.

As has been pointed out before, the payroll of full-time employees was brought down by reduction of force and rates almost directly in proportion to the decline in sales; such payrolls declined 47 percent compared with a sales decline of 49 percent. However, part-time payroll increased 52 percent in dollars and, therefore, more than 100 percent in proportion of sales, bringing the decline in total payroll down to about 44 percent.

Computed Operating Expense

Reported expenses differ from computed operati; g expese, in that the latter includes an imputed compensaton for the wage-value of the services of proprietors working in their own stores in lieu of employees.

Computed operating expense ratio in 1929 was 24.80 percent, which compared with the 21.12 percent of reported expenses described above. Presentation of material and textual discussion of operating expenses for 1933 is to be found in Volume I of this final series of Retail Census reports.

Description of Tables

Included in this volume are the following tables:

Table A is in two sections, one showing comparisons for 39 principal kinds of business in 1933 and in 1929 and the other presenting comparisons of similar data by States instead of by kinds of business. Only the United States summaries of Table A are included in this volume; the detailed tables for each separate State by kinds of business will be found in Volume I of the final series of retail reports.

Table 1 shows stores and sales, employment, payroll and reported expenses for 1933 by kinds of business. Separate reports are included for each State, in addition to a U. S. Summary by kinds of business (Table 1A) and by States (Table 1B).

Table 2 shows full-time and part-time employment separately by months, by kinds of business. This table also includes an analysis of total employment by sex. Separate reports are included for each State, in addition to a U. S. Summary by kinds of business (Table 2A) and by States (Table 2B).

RETAIL DISTRIBUTION: 1933

CENSUS OF AMERICAN BUSINESS: 1933

A CIVIL WORKS ADMINISTRATION PROJECT

RETAIL DISTRIBUTION

VOLUME III

COUNTY AND CITY SUMMARIES

MAY, 1935

U. S. DEPARTMENT OF COMMERCE

Daniel C. Roper, Secretary

—o—

BUREAU OF THE CENSUS

William L. Austin, Director

—o—

This is the third of the final series of reports on retail trade presenting the results of the 1933 Census of American Business. The statistics were collected in 1934 by a field canvass of retail stores in every State, city and county in the United States, with funds provided by the Federal Civil Works Administration. They cover the operations of retailers during the year 1933.

The reports are prepared under the supervision of Fred A. Gosnell, Chief Statistician for the Census of American Business, by John Guernsey, in charge of Retail Distribution. Assistance in the preparation of statistical data was rendered by William A. Ruff, Assistant Chief Statistician, and James O. Reid, Retail Assistant.

9947

RETAIL CENSUS REPORTS - FINAL SERIES: 1933

ARRANGEMENT AND CONTENTS OF VOLUMES

Volume 1 - U. S. Summary. Contains a general description of the Retail Census for 1933, definitions of terms and classifications, and U. S. Summaries, by kinds of business and by States, of Tables 1 to 6 and 10 to 12 contained in volumes listed below. It also includes tables providing an analysis of retail sales (Table 7), a summary of wholesalers' sales at retail (Table 8) and an analysis of receipts of service establishments (Table 9).

A separate section presents an analysis by size of city of stores and sales, classified into 11 kind-of-business groups. This analysis is carried through for each State and geographic division and summarized for the United States as a whole.

Comparisons with 1929 of the principal data by kinds of business are contained in a special table (Table A), which is presented separately for each State and in summary for the United States.

A chain-store section contains a summary of all known retail chains, classified by kinds of business, showing units, sales, stocks, employees and payroll in stores and in central office, reported expenses in stores and in central offices and the proportion prorated to stores.

Volume 2 - General Statistics, by States and 13 largest cities, by kinds of business (Table 1). Employment, by States and 13 largest cities, by kinds of business (Table 2).

Volume 3 - County Totals. Contains summary of stores, sales, proprietors, full-time employees and payroll for each city, town and county throughout the United States (Table 11), and summary by 52 kinds of business for each city of more than 50,000 population (Table 12).

Volume 4 - Analysis of Stores by Date of Establishment, showing for each State and for each kind of business the number and sales of stores established in 1933 (by quarters), those established between 1929 and 1933, and those in operation in 1933 which were also in operation in 1929 (Table 6).

Volume 5 - Credit Business. Contains analysis for each State of stores and sales, by kinds of business, classified to show credit-granting stores separate from all-cash stores (Table 5).

Volume 6 - Chains and Independents and other types of operation - State totals, and more detailed analyses for 18 kinds of business in which chains are a more or less important factor (Table 3).

Volume 7 - Stores and Sales by Size of Business Shows stores and sales by kinds of business, classified in 10 size groups, by States (Table 4).

Volume 8 - Retail Distribution, 1933, by Areas. Stores and sales by 11 business groups, for States, counties and cities (Table 10).

Special Reports by Trades. Food Retailing, Variety-Store Chains, Department-Store Chains, Drug Retailing (including drug-store chains), Retail Employment and Wages, Automotive Retailing, Apparel Retailing and others. (Separate reports have been issued covering the above-named subjects; they are not brought together in a single volume).

CENSUS OF AMERICAN BUSINESS

RETAIL DISTRIBUTION
VOLUME III - COUNTY AND CITY SUMMARIES

This volume, which presents summary data by areas concerning the number of stores, amount of sales, number of proprietors, average number of full-time employees, the total payroll and, separately, the amount of part-time payroll, is in two parts.

The first consists of Table 11 with the above described data for each State, each county, and each city of 2,500 or greater population.

The second part consists of Table 12 which lists in alphabetical order all cities of more than 50,000 population and shows for each city all of the above described data analyzed further by 52 kinds of business.

Because of the number of disclosures which would result in any attempt to present the same detail by kinds of business in the smaller cities a grouping of stores by 11 business groups for cities of 2,500 to 50,000 population has been made available in Volume VIII. This table, however, contains data only for stores and sales.

The population figures, given in Table 11 for each city, are as of April 1, 1930. Although the Bureau of the Census has prepared estimates of population in cities of 10,000 and over, as of Jnly 1, 1933, the figures for 1930 have been used here because the table includes also cities and incorporated places with population of 2,500 to 10,000.

Sales

Sales figures given in Tables 11 and 12 represent total net sales of retail stores in each designated area during the year 1933. They are not to be confused with total retail purchases of the population of such areas. Many cities attract to their stores a considerable volume of retail business from residents of other communities; likewise the residents of few, if any, communities limit their entire purchases to local stores. It is unsound, therefore, to use the total sales of the stores of any given area as the basis for computing so-called per-capita sales of such area.

Proprietors

The number of proprietors is the number of owners or partners of unincorporated businesses, and of the adult members of their families actively engaged in the operation of their stores. The great majority of proprietors are found in the very small stores with less than $10,000 of annual sales. Of the total of 1,574,341 proprietors about two-thirds or 1,089,987 are proprietors of the 982,193 stores whose sales volume is less than $10,000 per year. About 437,000 proprietors operate the 458,384 stores whose sales volume is between $10,000 and $50,000. In all stores of less than $50,000 of annual volume there are 1,527,659 active proprietors and 1,327,367 full-time employees. The aggregate sales volume of these 1,440,577 stores is $13,047,557,000.

Employees

Full-time employees as presented in Tables 11 and 12 represent the average number of employees working full-time, computed by averaging the twelve monthly employment figures reported to the Census. The monthly figures in detail may be found in Table 2, contained in Volume II of this final series of retail reports. No figures for part-time employment are given herein. They also may be found in Table 2 of Volume II.

Payroll

Payroll is presented in total and separately for part-time employees. The difference between total and part-time payroll is full-time payroll. The average compensation of full-time employees can be determined by dividing the full-time payroll by the average number of full-time employees. This, of course, is merely an approximation to the true annual compensation, because payroll represents an actual aggregate of compensation paid in the course of the year, whereas the average number of employees is not entirely identical with a true average of full man-months of employment.

In comparing average compensation of full-time employees by areas or by kinds of business it should be further noted that this figure is influenced by the composition of the group of full-time employees. For incorporated business the count of employees and the payroll include the higher paid executives, in addition to other employees, whereas for stores which happen to be unincorporated employment does not include the proprietors and firm members, who correspond in general to the executives of corporate businesses, nor does payroll include any allowance for the compensation of these proprietors. In comparisons by areas particular attention should be paid to the difference in the proportion of chains.

An analysis of retail distribution for each State and separately for 18 kinds of business, by types of operation, is to be found in Volume VI (Table 3).

Terms and Classifications

The various terms and classifications used throughout this volume are described in Chapter 2 of the U. S. Summary, Volume I of this final series.

Comparative Figures for 1929

Data for 1929 comparable to the data presented in this report are available in the reports of the 1929 Retail Census, contained in summary in part 1, and by States in parts 2 and 3 of Distribution, Volume I (Fifteenth Census of the United States: 1930).

Adjustments

After State and national totals were determined and published, certain errors of a minor nature were found which are duly reflected in the city and county figures in this Volume. They affect areas in Missouri, Ohio, Oklahoma, Pennsylvania, Texas, and Washington, as noted in the tables for those States. No adjustment has been made, however, in State or national totals, as the net effect on sales of all changes would be an addition of only $5,686,000.

1/ A number of small stores combining the sale of confectionery, tobacco products, newspapers and magazines, classified in 1929 as news stands, are described in the 1933 Census as confectionery stores, either by reason of a change in the character of their business or by local instructions to enumerators. Because of the limited nature of the information reported, it is impossible to make an accurate differentiation between these two classifications in the New York City boroughs.

X - Withheld to avoid disclosure of individual operations.

CENSUS OF AMERICAN BUSINESS

RETAIL DISTRIBUTION: 1933

BY AREAS

STORES AND SALES BY BUSINESS GROUPS

FOR

STATES, COUNTIES, AND CITIES

U. S. DEPARTMENT OF COMMERCE

Daniel C. Roper, Secretary

BUREAU OF THE CENSUS

William L. Austin, Director

--o--

This is one of a series of reports presenting the findings of the 1933 Census of American Business. The statistics were collected in 1934 by a field canvass of retail stores in every State, city, and county in the United States, with funds provided by the Federal Civil Works Administration. They cover the operations of retailers during the year 1933.

The reports are prepared under the supervision of Fred A. Gosnell, Chief Statistician for the Census of American Business, by John Guernsey, in charge of Retail Distribution. Assistance in the preparation of this report was rendered by William A. Ruff, Assistant Chief Statistician, and James O. Reid, Retail Assistant.

RETAIL DISTRIBUTION BY AREAS: 1933

Number of Stores and Sales, Classified by 11 Kinds of Business for Counties and All Places of 2,500, or Greater Population.

This special report of the Census of American Business presents in convenient form the number of stores and their sales in each of 11 kind-of-business classifications, for every county in the United States and for every incorporated city and town having a population in 1930 of 2,500 or more.

Population figures, appearing after the name of each city, represent the 1930 population. No adjustment has been made to reflect annexations which occurred in some areas subsequent to the 1930 Population Census, nor do they take into account any shifts in population since 1930.

Scope of the Census

The figures herein are from the 1933 Retail Census, a part of the Census of American Business. The data were obtained by field enumerators supplied by the Federal Civil Works Administration, who canvassed the stores and other retail places of business in every city, town and county throughout the United States. The field work was started in January, 1934, and completed at various dates, but in most areas by the end of April, 1934.

The schedules, as they were received, were examined and tested for accuracy and completeness, and were classified and coded according to the kinds of business which they represented and their types of operation.

The 11 kind-of-business classifications are, with the exception of liquor classifications, of the classifications used in the Retail Census of Distribution for 1929, which makes possible a valuable and significant comparison

between conditions as they existed in 1929 and as they existed in 1933. Other published reports of the Retail Census show comparisons of employment, payrolls, expenses and types of operation (chains, independents, and other types).

Retail Census reports for each State have been issued which show, for cities of 50,000 and greater population and for each State as a whole, the same eleven condensed groups expanded into 53 kind-of-business classifications.

Retail Distribution, as covered in this Census, is the process of purveying goods to ultimate consumers for consumption or utilization, together with services incidental to the sale of goods. The function of the retailer is primarily to anticipate the wants of the consumer and to make available, at the right time and at a convenient place, a reasonable selection of goods capable of satisfying those wants. The distinguishing characteristic of a retailer is that the business is done in a retail manner, in a place of business open to the general public.

The business classifications, although usually related broadly to the kind of merchandise carried, are not interchangeable with merchandise or commodity classifications. For instance, grocery store sales are not exclusively sales of groceries; apparel stores sell accessories and men's shoes in addition to outer apparel; drug stores sell many lines other than drugs. Stores are classified according to their principal commodities or according to their popular designation.

What is contained in each group

Food Stores include 10 classifications shown in detail in the State reports and in those cities whose population exceeds 50,000. They are:

Candy and confectionery stores
Dairy products stores (including milk dealers)
Delicatessen stores
Fruit stores and vegetable markets
Grocery stores (without meats)
Combination stores (groceries and meats)

Meat markets (including sea foods)
Bakeries---caterers
Bottled beer and liquor stores
Other food stores

The classification "bottled beer and liquor stores" is a new group which did not appear in the 1929 Census. It represents retailers whose principal business is the sale of liquor in bottles. Stores owned and operated by State Liquor Store Administrations are not included. It should be borne in mind that beer, wine and liquor are sold also in stores which fall into other business classifications.

Eating Places consist of restaurants, cafeterias, lunch rooms, lunch counters, refreshment stands and drinking places. The latter is a new classification which did not appear in the 1929 Census. Beer, wine and liquor in glasses, for consumption on the premises, are sold in restaurants and other eating places as well as in those places which are classified as drinking places.

Farmers' Supplies and Country General Stores represent two classifications found in the State reports. One is that of country general stores, which are typically general merchandise stores in the smaller communities and which also sell a substantial proportion of foods. In the 1929 Census the proportion of grocery lines and meats sold by country general stores, based upon a sample described in the reports of that Census, varied from an average of 54 percent to 67 percent. It is believed that the proportion of sales of groceries and meats was greater in 1933 than in 1929. The second classification within this group is that of farmers' supply stores. Included under that classification are:

Feed stores
Fertilizer dealers
Harness shops
Seed stores
Other stores whose business is primarily the sale of agricultural supplies.

General Merchandise Group consists of department stores, variety (5-and-10, and to-a-dollar) stores, dry goods stores, and general merchandise stores. The latter are stores selling a general line of merchandise in which food, if any, is a negligible item. General merchandising stores selling a substantial quantity of food are classified as country general stores, regardless of where located. General merchandise stores exceeding $100,000 in annual sales are classified as department stores. The distinction between department stores and dry goods stores is that department stores sell a greater variety of merchandise than merely dry goods and women's apparel (usually including furniture or other household lines and men's lines), whereas dry-goods stores appeal primarily or exclusively to women customers. A dry-goods store with sales exceeding $100,000 becomes a department store if, and when, it adds furniture, household appliances, hardware and/or men's clothing and furnishings. If its sales are less than $100,000 per year it becomes a general merchandise store.

Apparel Stores include the following classifications found in the State reports and in those of the larger cities:

Men's and boys' stores (clothing and furnishings)
Family clothing stores (men's, women's and children's)
Women's ready-to-wear specialty stores
Furriers——fur shops
Millinery stores (including leased millinery departments)
Custom tailors
Accessories and other apparel stores
Shoe stores

The classification "accessories and other apparel stores" includes corset and lingerie shops, hosiery shops, children's specialty shops, infants' wear shops, and mail-order houses engaged exclusively in the sale of apparel. Similar classifications appear in the 1929 Census.

Automotive Group (except filling stations) includes motor-vehicle dealers, used car dealers, automobile accessories, tire and battery stores,

dealers in motorcycles, bicycles and supplies related thereto, garages and repair shops, and other automotive retailers, including those selling airplanes and parts, and boats (motor boats, yachts and canoes). The automotive group as used in most instances throughout the Retail Census also includes filling stations, but for this report filling stations are separately listed.

Filling Stations are retailers primarily of gasoline and oil for the operation of motor vehicles. While gasoline and oil constitute their principal commodities, they may sell also such related commodities as tires, batteries and automotive accessories, and may operate lunch counters and/or tourist camps. Retailers of fuel oil for domestic consumption are also included. Tourist camps whose principal revenue is derived from room rentals and/or the sale of meals, whether or not they sell gasoline and oil incidentally, are included in the Census of Service Establishments and not in the Retail Census. In addition to filling stations, retailers of gasoline and oil include a large number of stores in other classifications, such as grocery stores, farmers' supplies and country general stores. For example, the 1929 Census showed 317,232 retailers selling gasoline and oil, of which only 121,513 were filling stations. (Retail Census report, "Automotive Trades: 1929", page 30).

Furniture and Household Group. This group consists primarily of five classifications found in the State reports as follows:

Furniture stores
Floor coverings, drapery, curtain and upholstery stores
Household appliance stores
Other home furnishings and appliance stores
Radio stores

Household appliance stores and dealers are those whose principal business is the sale of electric or gas household appliances such as refrigerators, ranges, washing machines, vacuum cleaners, and other electrical appliances. About 14 percent of the stores, doing 21.5 percent of total sales

in this classification, are units of chains. Three times as many stores are operated by gas and electric utility companies, primarily for the sale of appliances intended to increase the consumption of their gas and electricity. Utility-operated stores do 36.8 percent of the total sales in this classification. Independent stores are approximately equal in number (3,926) to the utility-operated stores, and they do 33.2 percent of the total sales in this classification.

The classification "other home furnishings and appliance stores" is identical with a similar classification in the 1929 Census, described in more detail on page 46 of the United States Summary for 1929. It includes aluminumware and brush canvassers, antique dealers, lamp shops, etc.

Lumber and Building Materials and Hardware Group contains six classifications described in detail in the State and larger city reports for 1933 as follows:

Lumber and building material dealers
Electrical shops (without radio)
Heating and plumbing shops
Paint and glass stores
Hardware stores
Hardware and farm implement stores

In using any of these classifications for market analysis it should be taken into consideration that it is extremely difficult to draw the line between wholesalers and retailers, particularly in the lumber and building material field. The same is true to the lesser extent in the hardware field. If a dealer reports that he does more than 50 percent of his business at wholesale he is classified in total in the Wholesale Census, which sets out separately as related data the amount of his retail business, but does not deduct it from the dealer's total sales. Such retail sales of wholesalers (or those selling more at wholesale than at retail) do not appear anywhere in the Retail Census. Likewise, dealers doing some but not 50 percent of their business at wholesale appear in total in the Retail Census.

Many lumber dealers and hardware stores which in 1929 did more than one-half of their business at retail have reported in the 1933 Census that a majority of their business now is done at wholesale. Therefore, they disappear from the Retail Census entirely and can be found only in the Wholesale Census. In this particular field it is essential that both Wholesale and Retail Census data be taken into consideration.

Drug Stores include those with and without fountains (which were classified separately in the 1929 Census), as well as leased drug departments and direct-mail retailers of drug items. Of the 58,407 stores shown in this report, 1,111 are direct-selling (house-to-house) retailers, 51 are mail-order houses, 3,760 are units of chains, and 53,341 are independents. More detail is available in the Census report on Types of Operation.

Other Stores. This group, which in this particular report excludes drug stores, contains the following classifications which likewise were included as such in the 1929 Census:

Book stores
Cigar stands
Coal and wood yards
Florists
Ice dealers
Jewelry stores
Music stores
Newsdealers
Office, school and store supply and equipment dealers
Optical stores
Printers
Stationers
Others not specifically included in groups elsewhere described.

Comparison with 1929

Following is a summary comparison of stores, sales, employment and payroll, between 1933 and the previous Census for 1929:

RETAIL DISTRIBUTION, 1933 and 1929 (United States)

	1933	1929	% of Change
Number of stores	1,526,119	1,543,158	- 1.1
Total sales	$25,037,225,000	$49,114,653,000	-49.0
Number of full-time employees	2,703,325	3,833,581	-29.5
Number of part-time employees	730,327	569,359 1/	+28.3
Number of proprietors (actively engaged in their stores but not on payrolls)	1,574,341	1,510,607	+ 4.2
Payroll:			
Total	$ 2,910,445,000	$ 5,189,670,000	-43.9
Full-time	2,664,447,000	5,028,282,000	-47.0
Part-time	245,998,000	161,388,000	+52.4
Average annual earnings per full-time employee	$986	$1,312	-24.9

1/ - Revised to show mathematical average comparable with the basis used for 1933.
